LIQUID MILK PURCHASING POLICY

Purpose

This purchasing policy defines the way in which we operate and manage the purchasing of liquid milk.

Scope

The policy is an information tool for our clients and operators, within London South Bank University practices and approach to liquid milk purchasing.

Responsibilities

The Elixir UK Purchasing Department's principal commitment is to ensure our suppliers deliver products and services to our business via a safe supply chain, ensuring compliance to legislative food and safety regulations. We work alongside the Elixir UK Safety & Wellbeing Team to maintain the highest standards. These are monitored by regular audits of supplier premises and practices.

In agreeance with London South Bank University and in light of recent market price inflation for Organic liquid milk Elixir have agreed to provide only Red Tractor certified liquid milk and offer Organic milk as an alternative add on in all outlets on campus that have a manually operated group head barista machine.

Governance

The policy is reviews at least annually by the unit senior management team and will be revised in accordance to any changes in legislation. We will be advised on these changes by Elixir UK Purchasing department and Compassion in World Farming.
