B. Course Aims and Features											

Distinctive features of course	<p>The need for the further development of appropriate skills, competencies and attitudes in caring for older people has been recognised. Changing demographics, treatments, technology and expectations are all powerfully influencing the development of Older People’s Care as a specialty. This course sees the care of older people as collaborative and inter-disciplinary with a positive view towards the possibilities of longer, healthier lives and the need to address those matters of ill health, which can threaten the quality of later life. The course will:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Ensure that values of compassion, dignity and empathy are central to all teaching and to work with students in a way that emphasizes these values and allows them to permeate students’ professional development. <input type="checkbox"/> Place interdisciplinary practice in all modules as the primary model of care. View patient care as collaborative; working alongside older people and their families with an approach that embraces the complexity of care and jointly developing solutions to these complexities. <input type="checkbox"/> Place an emphasis on promoting health, and maximizing the quality of life. <input type="checkbox"/> Develops skills with a view to producing excellence in care but also flexibility, and self-confidence in the practitioner. <input type="checkbox"/> Produce practitioners who embody good practice, are clinical leaders and advocates for older people and their careers.
Course Aims	<p>The Graduate Certificate in the Care of Older People aims to enable practitioners to:</p> <ol style="list-style-type: none"> 1 Develop a systematic, empathetic knowledge of the process and experience of ageing and a critical awareness of differing theories of the ageing process. 2 Practice the requisite knowledge and skills to assess, plan, implement and evaluate high-level care of the older person, carefully analysing and evaluating current evidence and best practice guidelines. 3 Demonstrate an approach to their own professional development which will facilitate an advancement in their personal practice. The student will enrich their personal skills in situations requiring the exercise of personal responsibility, and decision-making in complex and unpredictable circumstances.
Course Learning Outcomes	<p>a) Students will have knowledge and understanding of:</p> <ol style="list-style-type: none"> 1. Current research into the epidemiology, aetiology and neurobiology of the pathologies associated with ageing and show areas of uncertainty and ambiguity in our knowledge. 2. The management of their own learning and to make use of scholarly reviews and primary resources. 3. Current government policies and guidelines for good practice. 4. Promoting the best quality of life for older people. <p>b) Students will develop their intellectual skills such that they are able to:</p> <ol style="list-style-type: none"> 1. Effectively utilize knowledge of research into the ageing process; and demonstrate an awareness of the causes of ageing. 2. Evaluate their assessment and care planning skills when caring for older people associated with an understanding of clinical evidence and research into this field. 3. Critique the different approaches to research into the ageing process.

	<p>c) Students will acquire and develop practical skills such that they are able to:</p> <ol style="list-style-type: none"> 1. Begin to take decisions in complex and unpredictable contexts. 2. Communicate ideas, information problems and solutions to both fellow health professionals and non-expert audiences. <p>d) Students will acquire and develop transferrable skills such that they are able to:</p> <ol style="list-style-type: none"> 1. Develop effective communication skills and promote multidisciplinary relationships. 2. Develop a critical approach and evidence based practice approach to the care of older people. 3. Enhance skills in information technology and management of information 4. Further develop self –directed learning strategies self-evaluation skills and problem solving skills 5. Utilize skills in reflection and an ability to critically analyze own and others practice
--	--

C. Teaching and Learning Strategy

The course will be taught primarily in seminar groups; explicitly using the experience and insights of the course members to enrich their leaning culture. There will be a programme of computer-based blended learning to support the seminars. Students will evaluate each other’s learning and gain insights from close observation of peers and feedback from their own work. Students will be given a guided reading programme and an introduction to the range of materials on the internet. The course will be taught primarily in seminar groups; explicitly using the experience and insights of the course members to enrich the leaning culture. The Course will be supported throughout by the use of the university Virtual Learning environment; VLE), Moodle, with documents and eLearning activities and student forums. A guided reading programme will be given to the students. There will be a programme of computer-based blended learning to support the seminars and to provide access to support from fellow students and the module leaders. Students will evaluate each other’s learning and gain insights from close observation of peers and feedback from their own work. Students will have the opportunity to practice their skills in skill labs and in simulation learning exercises. It is expected that students will appraise and advise each other using their own insights, knowledge and experience. The course will provide students with an environment in which they can practice skills and share insights with each other in a non-threatening environment. The course will introduce students to differing non-clinical skills including information technology.

D. Assessment

Formative; A 500-word supportive document which outlines the intellectual basis of the presentation.

Summative:

Multiple Choice Question Exam: Physiological and Psychological Ageing.

Weighting = 50%

Pass Mark = 40%

Health promotion presentation.

The student makes a 20-minute presentation to peers as if speaking to a group of older people suffering from a particular condition. The student will be asked to give clear information about the condition and the underlying physiological changes in a way.

Formative:

A tutorial of the OSCE with the opportunity to have a trial of the OSCE before the assessed attempt.

Summative:

Part A Students will be expected to assess a patient in an Objective Structured Clinical Examinations. The student will carry out 20-minute assessment on an aspect of a patient using one of the approaches taught in the module.

Students will be expected to show a systematic understanding of key ideas in the clinical issue within the OSCE. But equally.

Formative Assessment: Students will submit one reflection from their developing portfolio for feedback from the module leader before the final submission.

Summative assessment:

A reflective portfolio, which will provide a range of evidence to demonstrate that the student, is working at the appropriate clinical level and is planning ways in which this practice and the knowledge base supporting it can be developed. The portfolio will use recent policy guidelines: in particular, the standards identified within the Frailty Pathway, as a framework against which student achievement can be measured.

E. Academic Regulations

The University's Academic Regulations apply for this course. Any course specific protocols will be identified here.

The school follows the university regulations apart from:

- Learners will not be eligible for compensation in the modules as a pass in all elements of assessment is required to demonstrate competence.

F. Entry Requirements

While being run within the Adult Nursing and Midwifery Department, with a large proportion of students who will be nurses, students would be welcomed from other health care disciplines and professions and the teaching will not be nursing-specific. It is thought that students would benefit most from the course after having worked for a period of time with older people and so would have a range of experiences upon which they can reflect.

The Graduate Certificate is aimed at staff who have completed an initial training and are looking to develop their knowledge, skills and competence to enrich their own current practice rather than thinking in terms of being involved yet in major management roles.

In order to be considered for entry to the course(s) applicants will be required to meet the following criteria:

- Applicants should have 120 credits at Level 5 or equivalent
- Normally a health or social care professional registered with the Health and Care Professional Council the Nursing and Midwifery Council
- Students are not expected to work in a specialist older adult care environment.
- The university allows candidates to use prior learning in order to meet entry requirements. There are many people working with older people in differing care environments. Applicants who are interested in the course or modules that do not have the specific entry requirements may use the University's Accreditation of Prior Learning (APL) procedures to support their application. Information about this is available in the CPPD prospectus

G. Course structure(s)

	Semester 1		Semester 2	
Level 6	Healthy Ageing WHN_6_201	20 credits	Assessment Skills in Working with Older People WHN_6_202	20 credits
			Frailty, Resilience and Enablement in Ageing	20 credits

Placements information

None

H. Course Modules

Module Code	Module Title	Level	Semester	Credit value	Assessment
WHN_6_201	Healthy Ageing	6	1	20 credits	MCQ Presentation
WHN_6_202	Assessment Skills in Working with Older People	6	2	20 credits	OSCE Viva
WHN_6_206	Frailty, Resilience and Enablement in Ageing	6	2	20 credits	4000 word reflective portfolio

I. Timetable information

- Timetable will be on moodle

J. Costs and financial support**Tuition fees/financial support/accommodation and living costs**

- Information on tuition fees/financial support can be found by clicking on the following link - <http://www.lsbu.ac.uk/courses/undergraduate/fees-and-funding> or
- <http://www.lsbu.ac.uk/courses/postgraduate/fees-and-funding>
- Information on living costs and accommodation can be found by clicking the following link- <https://my.lsbu.ac.uk/my/portal/Student-Life-Centre/International-Students/Starting-at-LSBU/#expenses>

List of Appendices

- Appendix A: Curriculum Map
- Appendix B: Educational Framework (undergraduate courses)
- Appendix C: Terminology

Appendix A: Curriculum Map

This map provides a design aid to help course teams identify where course outcomes are being developed, taught and assessed within the course. It also provides a checklist for quality assurance purposes and may be used in validation, accreditation and external examining processes. Making the learning outcomes explicit will also help students to monitor their own learning and development as the course progresses.

Appendix B: Personal Development Planning

A variety of terms are used in higher education to describe a process undertaken by individuals to gather evidence on, record and review their own learning and achievement, and identify ways in which they might improve themselves academically and more broadly. The term Personal Development Planning (PDP) is proposed to describe a structured process undertaken by an individual to reflect upon their own learning, performance and/or achievement and to plan for their personal educational and career development. The purpose of this tool is to help HE teaching staff to explain where PDP is being used within a course or portfolio of modules.

Approach to PDP	Level 6
1 Supporting the development and recognition of skills through the personal tutor system.	Each student will be assigned a named academic contact as a personal tutor this may be the module leader or course director for the pathway or a member of the course team. The personal tutor will provide academic guidance and pastoral support across the course of study and review wider academic progress. Formal meeting will be scheduled once every academic year to facilitate progress review and provide academic feedback. Additional meetings can be arranged as required. Evidence: personal tutor records
2 Supporting the development and recognition of skills in academic modules	Students will be supported to develop their academic skills and be able to work at level 6. This will be facilitated through tutorials, workshops and feedback from formative assessments. Skills for learning team will provide a workshop at the beginning of each semester on critical thinking, and academic writing. Students can access additional support through the student centre as needed. The module leaders and teaching team will provide tutorials on assessments and review draft work of students as needed. Assessment feedback will also provide guidance that will assist further academic development. Evidence: Formative and summative assessment feedback; personal tutor / module leader records
3 Supporting the development and recognition of skills through research module and final reflective reviews	An academic supervisor will be allocated to each student undertaking their final module. The role of the academic supervisor is to assist students by providing advice and guidance on how to prepare, and structure the review and guide them in the specialist area. All students will be allocated 9 hours of personal supervision for support and feedback on draft work. Evidence: Supervision records
4 Supporting the development and recognition of career management skills.	The Course Director for each course pathway and works closely with senior clinical staff in each speciality to continue to identify priorities to be included within courses. This will ensure that the course remains current and support the development of new relevant knowledge and skills. In addition, the speciality courses are designed in accordance with local and national competences / standards Evidence: Minutes of meetings with senior clinicians and stakeholders across trusts
5 Supporting the development and recognition of career management skills through work placements or work experience.	Students on this course are expected to have a minimum of 6 months post registration experience in a related area of practice and are able to achieve the relevant competences of the course. All students will need the support of managers and identification of relevant clinical mentors/ assessors that meet NMC mentor requirements Evidence: Reflective accounts; case studies
6 Supporting the development of skills by recognising that they can be developed	With the support of Course Director, module leader, and personal tutor, students studying at level 6 are expected to be able to identify their specific needs and develop an action plan to develop these skills. In addition, student learning will be facilitated by a multi-professional teaching team using

through extra curricula activities.	Blended Learning Approach. Students from different disciplines will engage in learning activities on Moodle. Evidence: Reflective accounts; participation in online discussion forums where applicable and e-tivities
7 Supporting the development of the skills and attitudes as a basis for continuing professional development.	Most health and social care professionals are required to demonstrate continuing professional development to maintain registration with their professional body. Course director and personal tutor will support this development. Evidence: Reflective accounts; personal tutor records/ re validation portfolio
8 Other approaches to personal development planning.	Course Director, and module leaders will support student personal development plan (PDP) through ongoing discussions and feedback. Students will be supported to identify a career pathway appropriate to meet their PDP. Evidence: Reflective accounts; personal tutor records
9 The means by which self-reflection, evaluation and planned development is supported e.g electronic or paper-based learning log or diary.	Students are encouraged to participate in critical reflection throughout the assessment strategy on this course. In addition, students are encouraged to participate in online learning activities that promote reflection and evaluation. Personal tutors will focus on the appropriate approaches for PDP for each student and the advantages of electronic versus paper-based learning log. Evidence: Reflective accounts; personal tutor record; formative and summative assessments; Moodle.

Appendix C: Terminology

[Please provide a selection of definitions according to your own course and context to help prospective students who may not be familiar with terms used in higher education. Some examples are listed below]

awarding body	a UK higher education provider (typically a university) with the power to award higher education qualifications such as degrees
bursary	a financial award made to students to support their studies; sometimes used interchangeably with 'scholarship'
collaborative provision	a formal arrangement between a degree-awarding body and a partner organisation, allowing for the latter to provide higher education on behalf of the former
compulsory module	a module that students are required to take
contact hours	the time allocated to direct contact between a student and a member of staff through, for example, timetabled lectures, seminars and tutorials
coursework	student work that contributes towards the final result but is not assessed by written examination
current students	students enrolled on a course who have not yet completed their studies or been awarded their qualification
delivery organisation	an organisation that delivers learning opportunities on behalf of a degree-awarding body
distance-learning course	a course of study that does not involve face-to-face contact between students and tutors
extracurricular	activities undertaken by students outside their studies
feedback (on assessment)	advice to students following their completion of a piece of assessed or examined work
formative assessment	a type of assessment designed to help students learn more effectively, to progress in their studies and to prepare for summative assessment; formative assessment does not contribute to the final mark, grade or class of degree awarded to students

higher education provider	organisations that deliver higher education
independent learning	learning that occurs outside the classroom that might include preparation for scheduled sessions, follow-up work, wider reading or practice, completion of assessment tasks, or revision
intensity of study	the time taken to complete a part-time course compared to the equivalent full-time version: for example, half-time study would equate to 0.5 intensity of study
lecture	a presentation or talk on a particular topic; in general lectures involve larger groups of students than seminars and tutorials
learning zone	a flexible student space that supports independent and social learning
material information	information students need to make an informed decision, such as about what and where to study
mode of study	different ways of studying, such as full-time, part-time, e-learning or work-based learning
modular course	a course delivered using modules
module	a self-contained, formally structured unit of study, with a coherent and explicit set of learning outcomes and assessment criteria; some providers use the word 'course' or 'course unit' to refer to individual modules
national teaching fellowship	a national award for individuals who have made an outstanding impact on student learning and the teaching profession
navigability (of websites)	the ease with which users can obtain the information they require from a website
optional module	a module or course unit that students choose to take
performance (examinations)	a type of examination used in performance-based subjects such as drama and music
professional body	an organisation that oversees the activities of a particular profession and represents the interests of its members
prospective student	those applying or considering applying for any programme, at any level and employing any mode of study, with a higher education provider

regulated course	a course that is regulated by a regulatory body
regulatory body	an organisation recognised by government as being responsible for the regulation or approval of a particular range of issues and activities
scholarship	a type of bursary that recognises academic achievement and potential, and which is sometimes used interchangeably with 'bursary'
semester	either of the parts of an academic year that is divided into two for purposes of teaching and assessment (in contrast to division into terms)
seminar	seminars generally involve smaller numbers than lectures and enable students to engage in discussion of a particular topic and/or to explore it in more detail than might be covered in a lecture
summative assessment	formal assessment of students' work, contributing to the final result
term	any of the parts of an academic year that is divided into three or more for purposes of teaching and assessment (in contrast to division into semesters)
total study time	the total time required to study a module, unit or course, including all class contact, independent learning, revision and assessment
tutorial	one-to-one or small group supervision, feedback or detailed discussion on a particular topic or project
work/study placement	a planned period of experience outside the institution (for example, in a workplace or at another higher education institution) to help students develop particular skills, knowledge or understanding as part of their course
workload	see 'total study time'
written examination	a question or set of questions relating to a particular area of study to which candidates write answers usually (but not always) under timed conditions
