B. Course Aims and Features		
Distinctive features of course	<p>The distinctive features of the courses include:</p> <ul style="list-style-type: none"> • The programme meets the HCPC Standards of Proficiency (2013) and HCPC Standards of Education and Training (2014), and enables successful students to be eligible to apply for registration with the Health and Care Professions Council as an occupational therapist. • It is an accelerated programme, over two years, for graduate students who already have a level 6 qualification. • The PgDip and MSc awards confer the professional qualification in occupational therapy. • The possibility to undertake a concurrent 60 credit dissertation module in year two to exit with an MSc award that will confer eligibility to apply for registration with HCPC. 	
Course Aims	<ul style="list-style-type: none"> • Demonstrate strong professional role identity, autonomy, accountability and resilience and be able to act as ambassadors for the profession; • Work in partnership with peers, colleagues, service users and carers, to promote participation, health and well-being; • Respond appropriately and sensitively to the needs of service users in an anti-discriminatory, inclusive and culturally competent way; • Practise occupational therapy in the context of current and emergent services and work effectively within a changing political and socio-economic climate; • Contribute to the evolution of the profession through the implementation of evidence-based practice; • Take professional and personal responsibility for life-long learning. 	

<p>Course Learning Outcomes</p>	<p>A Students will acquire knowledge and understanding of:</p> <p>A1 The philosophical and theoretical underpinnings of occupational therapy and occupational science, specifically the occupational nature of human beings, the analysis and performance of occupations and the occupational therapy process.</p> <p>A2 The therapeutic potential of occupation to maintain health and wellbeing and the factors that facilitate or challenge participation in occupations, such as social difference, diversity and deprivation.</p> <p>A3 The need to critically appraise and synthesise relevant theories and concepts from a range of disciplines, as they complement theories of occupation and participation.</p> <p>A4 The facilitation of accessible and adaptable environments to ensure the upholding of the individual's rights, needs and preferences.</p> <p>A5 The need to work in partnership with individuals, groups and communities using occupation in health promotion, rehabilitation and intervention, in order to promote participation, health and wellbeing.</p> <p>A6 The need to proactively influence the legal, political and social contexts within which occupational therapists practise.</p> <p>A7 Effective inter-professional working and collaboration as they apply to the organisation, management, delivery, quality and audit of services</p> <p>A8 The principles of professional accountability, leadership and change management and their application to occupational therapy practice.</p> <p>A9 The methods of research and inquiry which are used to create and interpret knowledge and the evidence-informed practice of occupational therapy</p> <p>A10 Research methodologies, forms of inquiry and models of evidence informed practice used within and beyond occupational therapy</p> <p>B Students will develop their intellectual skills such that they are able to:</p> <p>B1 Analyse, synthesise and critically appraise theories of occupation as they relate to occupational performance, health outcomes and well-being in the context of a changing society.</p> <p>B2 Systematically search a wide range of information sources, collect and analyse data effectively and critically evaluate findings to ensure that occupational therapy practice is evidence-informed, current and relevant to the client and communities.</p> <p>B3 Engage in rational and reasoned debate in relation to occupation and occupational therapy to critically evaluate and judge the impact of therapy on the service user.</p>
--	--

	<p>B4 Use professional and ethical reasoning to make decisions and judgements required for occupation-focused, evidence-informed and client-centred practice.</p> <p>B5 Analyse and critically appraise theories and aspects of current research evidence related to occupation and synthesise these in the context of a changing society.</p> <p>B6 Construct and defend reasoned argument to justify occupational therapy practice based on informed evidence, logical and systematic thinking.</p> <p>B7 Demonstrate a comprehensive and critical understanding of designs and methods relevant to research in occupation and occupational therapy, including ethics and dissemination.</p> <p>B8 Demonstrate self-direction and originality of thought together with progressively autonomous practice in preparation for life-long learning.</p> <p>C Students will acquire and develop practical skills such that they are able to:</p> <p>C1 Demonstrate professional reasoning, critical reflection and competent performance in academic work and through a range of professional practice settings.</p> <p>C2 Analyse, select, implement and evaluate occupational therapy strategies to address assessed occupational performance and participation needs.</p> <p>C3 Analyse, manage, adapt and use the environment to enable maximum occupational performance, participation and quality of life.</p> <p>C4 Demonstrate safe, ethical and competent application of all stages of the occupational therapy process.</p> <p>C5 Prepare, maintain, review and communicate documentation related to occupational therapy intervention and outcomes.</p> <p>C6 Understand the value of reflection on practice and the need to record the outcomes of these reflections to display resilience, resourcefulness and self-management.</p> <p>C7 Build therapeutic relationships and collaborative partnerships as the foundation for effective and sustainable occupational therapy practice.</p> <p>C8 Take a proactive role in the development, improvement and promotion of occupational therapy.</p> <p>C9 Interpret, analyse, synthesise and critique research informed evidence and use this to engage with continuous improvement of the quality of occupational therapy provision.</p>
--	--

	<p>D Students will acquire and develop transferrable skills such that they are able to:</p> <p>D1 Develop confidence in self-management, self-awareness, resilience and knowledge of own limitations as an occupational therapist.</p> <p>D2 Demonstrate independent learning ability and commitment to continuing life-long learning to enhance occupational therapy practice.</p> <p>D3 Demonstrate teamwork, interprofessional and collaborative skills.</p> <p>D4 Demonstrate a logical, systematic and creative approach to problem solving.</p> <p>D5 Interact and communicate effectively with peers, colleagues and a range of interprofessional teams and stakeholders.</p> <p>D6 Select and adapt communication skills to meet the needs of individual service users and carers.</p> <p>D7 Engage with technology, particularly the effective and efficient use of information and communication technology.</p>
--	--

C. Teaching and Learning Strategy

Inquiry-Based Learning

The PgDip Occupational Therapy course employs the philosophy of Inquiry-based Learning. Inquiry-based learning involves students carrying out small or large scale inquiries that enable them to engage actively and creatively with questions or problems from their discipline. This is a student-centred approach to learning that is of value in developing capability for life-long learning and employability (Brew, 2006). Inquiry based approaches include:

- Problem-based learning
- Experiential learning
- Case study

Additional Methods of Facilitating Learning

- Provision of material on-line and e-tivities
- Lectures
- Seminars and workshops
- Tutorials
- Critical reflection
- Structured reading/guided study
- Workbooks to develop and update knowledge
- Small group sessions
- Service User Perspectives

Student-directed learning

Student-directed learning is an important feature of the MSc/PgDip course. The MSc/PgDip students come to the course with a first degree and existing self-directed learning skills, so the aim of the course is to build on existing academic skills rather than develop new ones. As the student progresses through the course, the level of support and structure decreases with the student becoming increasingly

autonomous in directing their own learning. The Masters dissertation module is entirely self-directed with individual supervision from a member of the academic staff.

Practical skills are normally developed through practical, skills based sessions and inquiry based approaches.

Methods of facilitating learning:

- Problem-based learning
- Case studies
- Experiential activities
- Provision of material on-line and e-tivities
- Lectures
- Seminars and workshops
- Tutorials
- Critical reflection
- Structured reading/guided study
- Workbooks to develop and update knowledge
- Small group sessions
- Role modelling and direct observation and discussion in practice placement environments
- Clinical Skill laboratory demonstration and practice sessions
- Student-directed learning

D. Assessment

Assessment methods are specified in each Module Guide and cover the prescribed module and course learning outcomes. Content, knowledge and understanding are assessed through either coursework or on practice placement. Coursework can take many forms based on the practical or theoretical content of the modules.

- Essays
- Presentations
- Critical evaluations
- Critical appraisal of research
- Examinations
- Professional Development Profile
- Reports

E. Academic Regulations

The University's Academic Regulations apply for this course. Any course specific protocols will be identified here.

F. Entry Requirements

Pg Diploma & MSc Programmes: Applicants to these programmes will need to meet the following entry criteria (or recognised equivalent):

The admission and selection procedures outlined are based on the following principles:

- Fitness for practice
- An imperative to ensure flexibility of entry in accordance with Department of Health guidance

- The course team's commitment to facilitate equal opportunities at the point of entry and throughout the course.
- The values required to work in health and social care as stated in the NHS Constitution
- The values and purposes of VbR

The university operates an equal opportunities policy where there is no discrimination in view of age, gender, race, marital status, sexual orientation, socio-economic background, disability or religious beliefs.

All offers of places on the programme are conditionally based on:

1. Satisfactory outcome of an interview;
2. Occupational Health clearance;
3. Satisfactory outcome of an Enhanced Criminal Records Bureau Disclosure

Applications from candidates with disabilities are considered and assessment of abilities and needs undertaken sensitively. The safety of the potential students is an important consideration.

All applicants must be 18 years or over at the commencement of the course.

In order to be considered for entry to the programme applicants will be required to have the following qualifications:-

- Bachelors degree of 2:2 or above (subject area not specified) or equivalent as acceptable to London South Bank University
- Values and attributes that are comparable to the NHS constitution

Consideration will also be given to other relevant qualifications recognised as equivalent to the above.

Potential students may also apply for exemption for certain modules on the basis of prior learning and/or experience through the AP(E)L process when applying. This will be reviewed by the APEL team in the School for consideration of exemption.

Accreditation of Prior Learning

The College of Occupational Therapists Learning and Development Standards for Pre-Registration Education (2014) and current position statement on AP(E)L, Standard 4.3, states that "No more than one third of the programme or part of the programme may be subject to AP(E)L . An exception to this requirement is an occupational therapy student who is transferring between education providers. In this instance, the student must meet the assessment requirements and requirements of the receiving HEI and be recommended as 'fit for the profession' by the original programme (p15).

Students for whom English is not their first language must achieve a minimum score of 7 overall or equivalent with not less than 7.5 in listening/speaking and not less than 6.5 in writing and reading for the International English Language Test Score (IELTS) [or TOEFL: 570 including 55 in the Test of Spoken English (TSE) and at least 5 in the Test of Written English (TWE)], at the time of application.

In addition to the appropriate academic qualifications, applicants to both the programme will need to demonstrate the following abilities:

- Communicate effectively both verbally and in writing
- Commitment to the values and principles that underpin the occupational therapy profession
- Articulate their understanding of the role of the occupational therapist including the value base of the profession
- Demonstrate reasons for interest in chosen field of occupational therapy
- Reflect upon their life skills and the relevance to occupational therapy and the demands of the programme.
- Uphold the values and attributes required to work in health and social care as stated in the NHS constitution.
- Willingness to learn and engage in lifelong learning and support the achievement of quality care
- Personal resilience and adaptability to respond to and manage the demands of working in the evolving health and social care sectors.
- Demonstrate due regard for dignity, respect for persons, confidentiality and equal opportunities.

G. Course structure(s)

Pg Dip Occupational Therapy

Level 7 Year 1	S 1	<u>Module 1</u> 20 credits Introduction to Occupational Therapy and Occupational Science [To include Occupational Therapy practice 1 in semester 2 for 2021 for cohort 2020]	<u>Module 2</u> 20 credits Introduction to Human Function and Occupational Performance
	S 2	<u>Module 3</u> 20 credits Promoting health and well-being through occupation [To include Occupational Therapy Practice 2 in semester 2 of year 2 2021 for cohort 2020]	
Level 7 Year 2	S 1	<u>Module 5</u> 20 credits Person, Occupation and Environment	<u>Module 4</u> 20 credits Autonomy, accountability and development of professional identity [To include Occupational Therapy Practice 3 and 4]
	S 2	<u>Module 6</u> 20 credits Contemporary issues in Occupational Therapy	

MSc Occupational Therapy

Level 7 Year 1	S 1	<u>Module 1</u> 20 credits Introduction to occupational therapy and occupational science To include occupational therapy practice 1	<u>Module 2</u> 20 credits Introduction to Human Function and Occupational Performance	
	S 2	<u>Module 3</u> 20 credits Promoting health and well-being through occupation To include Occupational Therapy Practice 2 AT		
Level 7 Year 2	S 1	<u>Module 5</u> 20 credits Person, occupation and environment	<u>Module 4</u> 20 credits Autonomy, accountability and development of professional identity To include Occupational Therapy Practice 3 and 4	<u>Module 7</u> 60 credits Dissertation
	S 2	<u>Module 6</u> 20 credits Contemporary issues in occupational therapy		

Placements information

Practice education is an integral and major component of the total curriculum that enables students to demonstrate and achieve competence. The proportion of learning that takes place in practice varies by discipline; some disciplines report placement learning by percentage, others by hours. Learning gained in practice settings is vital to the students' educational and professional development and ensures appropriate competence development and assessment to practise as a professional in the chosen profession. Experience gained enables the acquisition of new knowledge and skills as well as the application, consolidation and reflection upon the learning gained in the university environment.

H. Course Modules

Overview of Assessments and Submission					
Module	Credits	Module title	Semester	Assessment	Weighting
Year 1					
1	20	Introduction to Occupational Therapy & Occupational Science	1	<u>Formative</u> 500 words in relation to PBL trigger <u>Summative</u> 3000 word essay with a focus on occupation Practice Placement 1	100% Pass/Fail
2	20	Human Function and Occupational Performance	1	<u>Formative</u> Formative exam with group discussion and feedback	

				<u>Summative</u> 2 hour written examination	100%
3	20	Promoting Health & Wellbeing through Occupation	1	<u>Formative</u> Small group tutorial facilitated discussion of progress with summative topic <u>Summative</u> Critical appraisal (3000 words) Practice Placement 2	100% Pass/fail
Overview of Assessments and Submission Schedule					
Module	Credits	Module title	Submission Semester	Assessment	Weighting
Year 2					
4	20	Autonomy, accountability & development of professional identity	2	<u>Formative</u> 10 minute reflection on elements of the Professional Development Portfolio (in relation to PP3), peer evaluation through Q&A and written feedback <u>Summative</u> 3000 word Professional Development Review (critical synthesis) Practice Placement 3 and 4	100% Pass/fail
5	20	Person, Environment & Occupation	2	<u>Formative</u> Presentation to peers (group presentation on environmental modification related to PBL trigger) <u>Summative</u> 3000 word essay with a focus on environment and/or long term conditions	100%
6	20	Contemporary Issues in Occupational Therapy	2	<u>Formative</u> Small group presentation exploring contemporary or emerging practice <u>Summative</u> Poster Presentation. Critical evaluation of a contemporary topic in Occupational Therapy (20 minutes with 10 minutes Q&A)	50% Pass/fail
For the award of the MSc in Occupational Therapy only					
7	60	Dissertation	2	<u>Summative</u> 12,000 word dissertation on either: a) A research project proposal	100%

				<p>b) A work based project – service evaluation, audit, role evaluation, practice development project</p> <p>c) A mini systematic review – a review that aspires to the rigor of a Cochrane review but recognises the student has time limits and is unlikely to get access to, for example, much grey literature.</p> <p>Some programmes may choose to restrict the types of project allowed for the programme</p> <p>Pass Mark – 50% Weighting - 100%</p>

HSC Top 20 Principles

The HSC 2020 curriculum will:
1. Produce highly employable professionals with the skills, knowledge and experience to make a difference
2. Represent the best in terms of contemporary content and delivery to ensure our students are the best.
3. Ensure that our assessment process complies with LSBU time frames and procedures and Professional Standards Regulatory Bodies
Our students will:
4. Demonstrate commitment to safe, effective, person centred Health and Social Care
5. Be provided with opportunities to learn with those from other professional disciplines
6. Demonstrate the highest standard of professionalism underpinned by the core LSBU, NHS and Social values
7. Be personally valued and supported
8. Where appropriate and practicable, all students will spend at least one third of their practice time in community settings
9. Have graduate skills in addition to demonstrating skills in prioritising, problem solving, decision making, team working and management to meet Health and Social Care needs
10. Be prepared to work with people who are at risk from exclusion from health and social care services to include disability, mental health problems, culture and ethnicity
11. Demonstrate they are dementia aware and we will deliver HEE dementia education standards and principles
12. Be digitally literate
13. Be able to critically appraise research and implement best evidence in their practice.
14. Our graduates will be enterprising, innovative and inspirational
Our staff will:
15. Support our students to work and think flexibly and creatively and to develop personal resilience
16. Co-design and deliver courses in partnership with students, service users/carers, employers and academics
17. Continuously evaluate our courses providing opportunities to implement changes and improvement in response to student and stakeholder feedback
18. Deliver teaching and learning using dynamic, innovative and participatory approaches to promote transformative learning.
19. Adopt innovative, relevant and varied forms of assessment
20. Be committed to their own professional development and lifelong learning.

Appendix C: Terminology

[Please provide a selection of definitions according to your own course and context to help prospective students who may not be familiar with terms used in higher education. Some examples are listed below]

awarding body	a UK higher education provider (typically a university) with the power to award higher education qualifications such as degrees
bursary	a financial award made to students to support their studies; sometimes used interchangeably with 'scholarship'
collaborative provision	a formal arrangement between a degree-awarding body and a partner organisation, allowing for the latter to provide higher education on behalf of the former
compulsory module	a module that students are required to take
contact hours	the time allocated to direct contact between a student and a member of staff through, for example, timetabled lectures, seminars and tutorials
coursework	student work that contributes towards the final result but is not assessed by written examination
current students	students enrolled on a course who have not yet completed their studies or been awarded their qualification
delivery organisation	an organisation that delivers learning opportunities on behalf of a degree-awarding body
distance-learning course	a course of study that does not involve face-to-face contact between students and tutors
extracurricular	activities undertaken by students outside their studies
feedback (on assessment)	advice to students following their completion of a piece of assessed or examined work
formative assessment	a type of assessment designed to help students learn more effectively, to progress in their studies and to prepare for summative assessment; formative assessment does not contribute to the final mark, grade or class of degree awarded to students

higher education provider	organisations that deliver higher education
independent learning	learning that occurs outside the classroom that might include preparation for scheduled sessions, follow-up work, wider reading or practice, completion of assessment tasks, or revision
intensity of study	the time taken to complete a part-time course compared to the equivalent full-time version: for example, half-time study would equate to 0.5 intensity of study
lecture	a presentation or talk on a particular topic; in general lectures involve larger groups of students than seminars and tutorials
learning zone	a flexible student space that supports independent and social learning
material information	information students need to make an informed decision, such as about what and where to study
mode of study	different ways of studying, such as full-time, part-time, e-learning or work-based learning
modular course	a course delivered using modules
module	a self-contained, formally structured unit of study, with a coherent and explicit set of learning outcomes and assessment criteria; some providers use the word 'course' or 'course unit' to refer to individual modules
national teaching fellowship	a national award for individuals who have made an outstanding impact on student learning and the teaching profession
navigability (of websites)	the ease with which users can obtain the information they require from a website
optional module	a module or course unit that students choose to take
performance (examinations)	a type of examination used in performance-based subjects such as drama and music
professional body	an organisation that oversees the activities of a particular profession and represents the interests of its members
prospective student	those applying or considering applying for any programme, at any level and employing any mode of study, with a higher education provider

regulated course	a course that is regulated by a regulatory body
regulatory body	an organisation recognised by government as being responsible for the regulation or approval of a particular range of issues and activities
scholarship	a type of bursary that recognises academic achievement and potential, and which is sometimes used interchangeably with 'bursary'
semester	either of the parts of an academic year that is divided into two for purposes of teaching and assessment (in contrast to division into terms)
seminar	seminars generally involve smaller numbers than lectures and enable students to engage in discussion of a particular topic and/or to explore it in more detail than might be covered in a lecture
summative assessment	formal assessment of students' work, contributing to the final result
term	any of the parts of an academic year that is divided into three or more for purposes of teaching and assessment (in contrast to division into semesters)
total study time	the total time required to study a module, unit or course, including all class contact, independent learning, revision and assessment
tutorial	one-to-one or small group supervision, feedback or detailed discussion on a particular topic or project
work/study placement	a planned period of experience outside the institution (for example, in a workplace or at another higher education institution) to help students develop particular skills, knowledge or understanding as part of their course
workload	see 'total study time'
written examination	a question or set of questions relating to a particular area of study to which candidates write answers usually (but not always) under timed conditions
