B. Course Aims and Features

| | |
|---------------------------------------|---|
| Distinctive features of course | BSc (Hons) Psychology (Health and Nutrition) offers students the opportunity to graduate with a British Psychological Society-accredited undergraduate degree oriented towards their particular interests in the psychology of health and nutrition. In the first year of the course, students follow the same modules as for the BSc (Hons) Psychology course except that they study two modules from Health and Nutrition and two from Psychology in Semester 2. In the second year of the course, students study two modules for the BSc (Hons) Psychology course. In the third year of the course, in addition to two optional modules in Semester 2, students undertake a specialised research project in the area of psychology of health and nutrition and taught modules in Health Psychology and a module from Health and Nutrition. There is also an opportunity in the third year for students to complete an assessed professional placement in an area related to the psychology of health and nutrition. Completion of this course will provide students with expertise in the psychology of health and nutrition. |
| Course Aims | The BSc (Hons) Psychology (Health and Nutrition) aims to: <ol style="list-style-type: none"> 1. Provide students with a grounding in the empirical study of behaviour and of psychological processes and to acquaint them with the major facts, theories and debates in contemporary Psychology; 2. Provide students with specific expertise in the empirical study of health and nutrition from a psychological perspective, and to acquaint them with the major theories and contemporary debates in this specialist field; 3. Provide an up-to-date curriculum that is delivered to a high quality and is informed by scholarship and research; 4. Provide students with the knowledge, skills and techniques to identify and investigate psychological issues and problems empirically and ethically; 5. Support and meet the needs of students from varied educational and personal backgrounds so that they have the best opportunity to meet the demands of degree-level education; 6. Ensure students develop the core skills of critical thinking, communication, and employability, which provide a sound basis for progression into work and/or further study. |

| | |
|--|--|
| | 7. Provide programmes of study that lead to Graduate Membership and eligibility for the Graduate Basis for Chartered membership of the British Psychological Society. |
| Course Learning Outcomes | <p>a) Students will have knowledge and understanding of:</p> <p>A1 Biological psychology including evolutionary approaches and genetics, the biological basis of perception, learning and behaviour, brain functioning and neuroanatomy, synaptic transmission, neuropsychology and hormones.</p> <p>A2 Cognitive psychology including perception, attention, memory, language, thinking, reasoning and decision-making.</p> <p>A3 Social psychology including social cognition, critical approaches to understanding social behaviour, interpersonal behaviour intrapersonal behaviour, group processes, social communication, social development, and intergroup relations and conflict.</p> <p>A4 Developmental psychology including cognitive and language development, social behaviour, emotional development and attachment.</p> <p>A5 Individual differences including personality, intelligence, psychological testing, emotions and feelings, abnormal psychology and mental health.</p> <p>A6 Research methods and statistics including research design, quantitative methods, statistical analysis, inference and interpretation, qualitative analysis, and ethics in research design and conduct.</p> <p>A7 Conceptual and historical issues in psychology including locating current approaches in the developing history of the discipline, defining principles of psychology, approaches to the study of behaviour and experience, and conceptual debates.</p> <p>A8 Applied psychology encompassing principles of application to real world issues, with a particular focus on sport psychology.</p> <p>b) Students will develop their intellectual skills such that they are able to:</p> <p>B1 Integrate and evaluate multiple psychological perspectives, and to generate, explore, and evaluate research questions and empirical evidence, for theoretical and real world applications, using a diverse range of source material</p> <p>c) Students will acquire and develop practical skills such that they are able to:</p> <p>C1 Write, speak, and listen appropriately in a variety of environments and for a range of audiences, both independently and as part of a group.</p> <p>d) Students will acquire and develop transferrable skills such that they are able to:</p> <p>D1 Recognise, utilise and reflect upon those abilities which are relevant for successful employment in psychology-specific and other professions.</p> |
| C. Teaching and Learning Strategy | |

- A1, A2, A3, A4, A5, A7, and A8 are all introduced in level 4. These core domains are delivered via a combination of lectures plus seminars or workshops in all levels. Topic areas are added and developed in level 5. In level 6 students specialise through a number of optional modules. In most level 4 seminars practical and/or interactive exercises that either support learning or enhance study skills are used. In levels 5 and 6 a variety of seminar, workshop, presentation, interactive and e-learning activities aim to help students develop their critical and analytical skills.
- A6 is covered in a spine of modules running through levels 4 and 5. Topics are covered in a combination of lectures, seminars and practical classes. A major piece of empirical work, requiring working knowledge of this domain, is carried out in level 6.
- Directed reading is an important aspect of teaching and learning in all domains. The amount, sophistication and primary nature of the directed reading increases from level 4 through level 6.
- Critical thinking is developed in a scaffolded manner, such that students are provided with level appropriate guidance and signposting as outlined in the table below. Module outcomes have been developed to reflect these stepping stones.

Stepping Stones in the Development of Critical Thinking Skills

| | Level 4 | Level 5 | Level 6 |
|------------------------------------|---|--|---|
| Knowledge and understanding | <ul style="list-style-type: none"> • Awareness that knowledge base is open to ongoing debate and reformulation • Understands the difference between primary and secondary sources | <ul style="list-style-type: none"> • Recognises the weight of evidence in supporting perspectives • Recognises that perspectives/approaches can differ in the quality of evidence used to support them | <ul style="list-style-type: none"> • Can relate the knowledge base to other fields of study |
| Conceptualisation | <ul style="list-style-type: none"> • Identifies key concepts • Identifies strengths and weaknesses of above | <ul style="list-style-type: none"> • Recognises competing perspectives | <ul style="list-style-type: none"> • Can argue from competing perspectives |
| Synthesis | <ul style="list-style-type: none"> • Collects information from a variety of sources | <ul style="list-style-type: none"> • Synthesises information from a variety of sources | <ul style="list-style-type: none"> • Applies knowledge in unfamiliar contexts |
| Evaluation | <ul style="list-style-type: none"> • Judges the reliability of data | <ul style="list-style-type: none"> • Compare methods and techniques • Can select appropriate methods for evaluation | <ul style="list-style-type: none"> • Sophisticated explanation for contradictory data/evidence |

- There is a focus on the explicit teaching of written, spoken, and listening based communication skills at level 4. This is then further developed at levels 5 and 6.
- We have placed employability at the heart of our psychology courses. To this end, the teaching and learning strategy will ensure that students are aware of skills development in relation to future employment (e.g. through personal developmental programmes, academic tutoring, clear signposting of skills development within modules, career and skills development opportunities from the Division and central services).

D. Assessment

Assessment is varied. Summative assessments at levels 5 and 6 are generally assessed with a combination of examination and coursework. Coursework activities vary from essays through to a commentary on a persuasive communication, applied reports and research reports.

Examination formats vary. Some use multiple choice questions, short answer questions, essays and tests of statistical knowledge and reasoning

Formative assessment using traditional and e-learning tools are built in to all modules.

Critical thinking is assessed in all modules, at the appropriate level (see above table). Summative assessment of critical thinking only occurs after formative assessment; therefore, a large component of formative assessment of critical thinking takes place at level 4, with summative assessment taking place increasingly at levels 5 and 6.

Communication skills are assessed in all modules, at the appropriate level. Summative assessment of communication skills only occurs after formative assessment; therefore, a large component of formative assessment of communication skills takes place at level 4, with summative assessment taking place increasingly at levels 5 and 6.

Assessment of employability skills is a mixture of formative and summative assessment in modules across all levels. Employability skills are also supported and developed via academic tutoring, and as such are formatively assessed outside taught modules.

E. Academic Regulations

The University's Academic Regulations apply for this course. Any course specific protocols will be identified here.

F. Entry Requirements

The standard entry requirement for students (under 21 years old on Sept 1st) is 120 UCAS points plus 5 passes at GCSE level at grade C or above (reformed GCSEs Grade 4 or above) which must include English Language and Mathematics.

Applicants can be admitted if they pass the Access to HE Diploma with a minimum of 24 Distinctions and 21 Merits

Credit may be given for prior learning via APL at level 4 only and in accordance with the policies set by LSBU.

G. Course structure(s)

Course overview

Awards are given in accordance with current London South Bank University Academic Regulations for Taught Programmes. Students are required to do six psychology modules in each of Levels 4, 5 and 6. All psychology modules in Levels 4 and 5 are compulsory. At Level 6 there is a combination of compulsory and optional modules depending on route. See below. The programme confers professional certification by the British Psychological Society (GBC) on graduates and the modules required for GBC are indicated below.

The Empirical Project module is exempt from the compensated pass regulation. To obtain GBC students have to pass the modules indicated in the curriculum below with an overall degree classification of 2:2 or above:

BSc (Hons) Psychology (Health and Nutrition)– **Full time**

Placements information

Students have the option of taking the placement module at level 6. Students will find their own placements.

H. Course Modules

- Level 6 optional modules are subject to change depending on staffing and availability.
 - Should an optional module need to be changed, students will be notified by email and also in person at lectures as appropriate. If the change occurs after students have selected their module options, students will be offered the opportunity to switch to another module of their choice.

| Module Code | Module Title | Level | Semester | Credit value | Assessment |
|--------------------|---|--------------|-----------------|---------------------|---|
| ASC_4_409 | Nutrition, Health & Disease | 4 | 1 | 20 | - Exam (100%) |
| PSY_4_IWP | Introducing Real World Psychology | 4 | 1 | 20 | - Portfolio (poster 70%, annotated bibliography 30%) (100%) |

| PSY_6_PP F | Thinking: Past, Present & Future | 6 | 1 | 20 | - Portfolio (Group oral poster presentation 40%, 2 mini essays 60%) (100%) |
| PSY_6_PY P | Psychopharmacology | 6 | 1 | 20 | - Technical report (50%) - Exam (50%) |
| PSY_6_PP P | Professional Placement in Psychology | 6 | 1 or 2 | 20 | - Reflective essay (100%) |
| PSY_6_PW K | Psychology in the Workplace | 6 | 2 | 20 | - Portfolio of work (group oral PPT presentation 60%, reflective essay 40%) (100%) |
| PSY_6_CP P | Counselling Psychology and Psychotherapy | 6 | 2 | 20 | - Coursework essay (100%) |
| PSY_6_PM H | Psychology of Mental Health and Distress | 6 | 1 | 20 | - Coursework essay (100%) |
| EAA_6_413 | Advanced Topics in Human Nutrition | 6 | 2 | 20 | - In-class review essay (40%) - SAQ test (30%) - Oral presentation(30%) |

I. Timetable information

[indicate:

Provide as much information as possible,

- when students can expect to receive a confirmed timetable for study commitments; and
- if there is a teaching-free afternoon set aside for e.g. sporting/cultural activities.
- Don't specify a day(s) when teaching will take place if it may be changed.
- Prospective students should be kept informed of any changes.]

J. Costs and financial support

Course related costs

- provide information about other course-related costs (explain what is and what is not included in the tuition fees, e.g. such additional expenses as cost of books or other learning materials, specialist equipment, uniforms, clothing required for work placements, field trips, bench fees).

Tuition fees/financial support/accommodation and living costs

- Information on tuition fees/financial support can be found by clicking on the following link - <http://www.lsbu.ac.uk/courses/undergraduate/fees-and-funding> or
- <http://www.lsbu.ac.uk/courses/postgraduate/fees-and-funding>
- Information on living costs and accommodation can be found by clicking the following link- <https://my.lsbu.ac.uk/my/portal/Student-Life-Centre/International-Students/Starting-at-LSBU/#expenses>

List of Appendices

- Appendix A: Curriculum Map
- Appendix B: Educational Framework (undergraduate courses)
- Appendix C: Terminology

Appendix A: Curriculum Map

This map provides a design aid to help course teams identify where course outcomes are being developed, taught and assessed within the course. It also provides a checklist for quality assurance purposes and may be used in validation, accreditation and external examining processes. Making the learning outcomes explicit will also help students to monitor their own learning and development as the course progresses.

A = Assessed (Summative), T = Taught, D = Developed. * = depending on topic chosen. Note: All modules are 20 credits except the Empirical Project, which is 40 credits.

Appendix B: Embedding the Educational Framework for Undergraduate Courses

The Educational Framework at London South Bank University is a set of principles for curriculum design and the wider student experience that articulate our commitment to the highest standards of academic knowledge and understanding applied to the challenges of the wider world.

The Educational Framework reflects our status as University of the Year for Graduate Employment awarded by *The Times and The Sunday Times Good University Guide 2018* and builds on our 125 year history as a civic university committed to fostering social mobility through employability and enterprise, enabling our students to translate academic achievement into career success.

There are four key characteristics of LSBU's distinctive approach to the undergraduate curriculum and student experience:

- Develop students' professional and vocational skills through application in industry-standard facilities
- Develop our students' graduate attributes, self-awareness and behaviours aligned to our EPIIC values
- Integrate opportunities for students to develop their confidence, skills and networks into the curriculum
- Foster close relationships with employers, industry, and Professional, Statutory and Regulatory Bodies that underpin our provision (including the opportunity for placements, internships and professional opportunities)

The dimensions of the Educational Framework for curriculum design are:

- **informed by employer and industry** needs as well as professional, statutory and regulatory body requirements
- **embedded learning development** for all students to scaffold their learning through the curriculum taking into account the specific writing and thinking requirements of the discipline/profession
- **high impact pedagogies** that enable the development of student professional and vocational learning through application in industry-standard or authentic workplace contexts
- **inclusive teaching, learning and assessment** that enables all students to access and engage the course
- **assessment for learning** that provides timely and formative feedback

All courses should be designed to support these five dimensions of the Educational Framework. Successful embedding of the Educational Framework requires a systematic approach to course design and delivery that conceptualises the student experience of the curriculum as a whole rather than at modular level and promotes the progressive development of understanding over the entire course. It also builds on a well-established evidence base across the sector for the pedagogic and assessment experiences that contribute to high quality learning.

This appendix to the course specification document enables course teams to evidence how their courses meet minimum expectations, at what level where appropriate, as the basis for embedding the Educational Framework in all undergraduate provision at LSBU.

| Dimension of the Educational Framework | Minimum expectations and rationale | How this is achieved in the course |
|--|---|--|
| Curricula informed by employer and industry need | <p><u>Outcomes focus and professional/employer links</u> All LSBU courses will evidence the involvement of external stakeholders in the curriculum design process as well as plan for the participation of employers and/or alumni through guest lectures or Q&A sessions, employer panels, employer-generated case studies or other input of expertise into the delivery of the course provide students with access to current workplace examples and role models. Students should have access to employers and/or alumni in at least one module at level 4.</p> | <p>The programme is based upon the BPS framework for teaching undergraduate psychology courses.</p> <p>Guest lecturers (psychologists registered with the Health and Care Professions Council - HCPC) included within the curriculum at level 4.</p> <p>Students are encouraged to join the British Psychological Society, with 1 year of student membership provided by the Division of Psychology.</p> |
| Embedded learning development | <p><u>Support for transition and academic preparedness</u> At least two modules at level 4 should include embedded learning development in the curriculum to support student understanding of, and familiarity with, disciplinary ways of thinking and practising (e.g. analytical thinking, academic writing, critical reading, reflection). Where possible, learning development will be normally integrated into content modules rather than as standalone modules. Other level 4 modules should reference and reinforce the learning development to aid in the transfer of learning.</p> | <p>All level 4 modules contain embedded learning development of key academic skills using a variety of teaching methods.</p> |
| High impact pedagogies | <p><u>Group-based learning experiences</u> The capacity to work effectively in teams enhances learning through working with peers and develops student outcomes, including communication, networking and respect for diversity of perspectives relevant to professionalism and inclusivity. At least one module at level 4 should include an opportunity</p> | <p>A scaffolding approach to group-based learning is taken from level 4 (beginning with a formative exercise) and across the course with summative assessments.</p> |

| | | |
|---|---|---|
| | <p>for group working. Group-based learning can also be linked to assessment at level 4 if appropriate. Consideration should be given to how students are allocated to groups to foster experience of diverse perspectives and values.</p> | |
| Inclusive teaching, learning and assessment | <p><u>Accessible materials, resources and activities</u> All course materials and resources, including course guides, PowerPoint presentations, handouts and Moodle should be provided in an accessible format. For example, font type and size, layout and colour as well as captioning or transcripts for audio-visual materials. Consideration should also be given to accessibility and the availability of alternative formats for reading lists.</p> | <p>All lecture and seminar/workshop materials, and reading lists are available on Moodle in accessible format that students can modify to suit their individual needs (e.g. font size, colour etc.).</p> <p>Reading is presented on Moodle site by week, and also in electronic reading list.</p> |
| Assessment for learning | <p><u>Assessment and feedback to support attainment, progression and retention</u> Assessment is recognised as a critical point for at risk students as well as integral to the learning of all students. Formative feedback is essential during transition into university. All first semester modules at level 4 should include a formative or low-stakes summative assessment (e.g. low weighted in final outcome for the module) to provide an early opportunity for students to check progress and receive prompt and useable feedback that can feed-forward into future learning and assessment. Assessment and feedback communicates high expectations and develops a commitment to excellence.</p> | <p>Formative or low-stakes assessment is included in all level 4 modules.</p> <p>A scaffolding approach to assessment with formative activity or assessment embedded within modules, to provide students with individual feedback (written or verbal) to support their skill development.</p> <p>Feedback for summative assessments is provided in written form and include practical suggestions to support them to improve future work.</p> |
| High impact pedagogies | <p><u>Research and enquiry experiences</u> Opportunities for students to undertake small-scale independent enquiry enable students to understand how knowledge is generated and tested in the discipline as well as prepare them to engage in enquiry as a highly sought after outcome of university study. In preparation for an undergraduate</p> | <p>Research modules are integral to the course. A scaffolding approach is taken across each semester, to support the learning and skill development required to conduct an independent study in final year empirical project.</p> |

| | | |
|---|--|---|
| | <p>dissertation at level 6, courses should provide opportunities for students to develop research skills at level 4 and 5 and should engage with open-ended problems with appropriate support. Research opportunities should build student autonomy and are likely to encourage creativity and problem-solving. Dissemination of student research outcomes, for example via posters, presentations and reports with peer review, should also be considered.</p> | <p>Publication in peer-reviewed journals is considered for final year empirical projects.</p> |
| <p>Curricula informed by employer and industry need / Assessment for learning</p> | <p><u>Authentic learning and assessment tasks</u> Live briefs, projects or equivalent authentic workplace learning experiences and/or assessments enable students, for example, to engage with external clients, develop their understanding through situated and experiential learning in real or simulated workplace contexts and deliver outputs to an agreed specification and deadline. Engagement with live briefs creates the opportunity for the development of student outcomes including excellence, professionalism, integrity and creativity. A live brief is likely to develop research and enquiry skills and can be linked to assessment if appropriate.</p> | <p>Final year empirical projects enable authentic workplace learning experience and are assessed. This includes project design, communicating with Ethics boards and the opportunity to engage with external clients.</p> <p>Students have the opportunity to take a professional placement module at level 6, also linked to assessment.</p> |
| <p>Inclusive teaching, learning and assessment</p> | <p><u>Course content and teaching methods acknowledge the diversity of the student cohort</u> An inclusive curriculum incorporates images, examples, case studies and other resources from a broad range of cultural and social views reflecting diversity of the student cohort in terms of, for example, gender, ethnicity, sexuality, religious belief, socio-economic background etc. This commitment to inclusivity enables students to recognise themselves and their experiences in the curriculum as well as foster understanding of other viewpoints and identities.</p> | <p>This is embedded within course content across modules.</p> |

| | | |
|---|---|---|
| <p>Curricula informed by employer and industry need</p> | <p><u>Work-based learning</u> Opportunities for learning that is relevant to future employment or undertaken in a workplace setting are fundamental to developing student applied knowledge as well as developing work-relevant student outcomes such as networking, professionalism and integrity. Work-based learning can take the form of work experience, internships or placements as well as, for example, case studies, simulations and role-play in industry-standards settings as relevant to the course. Work-based learning can be linked to assessment if appropriate.</p> | <p>Final year empirical projects provide the opportunity for learning to develop work-relevant skills.</p> <p>Students also have the opportunity to take a professional placement module at level 6, also linked to assessment.</p> <p>The course has an applied focus with several modules that include simulation of workplace contexts in assessments.</p> |
| <p>Embedded learning development</p> | <p><u>Writing in the disciplines: Alternative formats</u> The development of student awareness, understanding and mastery of the specific thinking and communication practices in the discipline is fundamental to applied subject knowledge. This involves explicitly defining the features of disciplinary thinking and practices, finding opportunities to scaffold student attempts to adopt these ways of thinking and practising and providing opportunities to receive formative feedback on this. A writing in the disciplines approach recognises that writing is not a discrete representation of knowledge but integral to the process of knowing and understanding in the discipline. It is expected that assessment utilises formats that are recognisable and applicable to those working in the profession. For example, project report, presentation, poster, lab or field report, journal or professional article, position paper, case report, handbook, exhibition guide.</p> | <p>Students undertake several industry related tasks. For example, case report, research reports, technical reports, posters and presentations.</p> |
| <p>High impact pedagogies</p> | <p><u>Multi-disciplinary, interdisciplinary or interprofessional group-based learning experiences</u></p> | <p>Students have the opportunity to take a professional placement module at level 6, also linked to assessment.</p> |

| | | |
|--|---|--|
| | <p>Building on experience of group working at level 4, at level 5 students should be provided with the opportunity to work and manage more complex tasks in groups that work across traditional disciplinary and professional boundaries and reflecting interprofessional work-place settings. Learning in multi- or interdisciplinary groups creates the opportunity for the development of student outcomes including inclusivity, communication and networking.</p> | |
| Assessment for learning | <p><u>Variation of assessment</u> An inclusive approach to curriculum recognises diversity and seeks to create a learning environment that enables equal opportunities for learning for all students and does not give those with a particular prior qualification (e.g. A-level or BTEC) an advantage or disadvantage. An holistic assessment strategy should provide opportunities for all students to be able to demonstrate achievement of learning outcomes in different ways throughout the course. This may be by offering alternate assessment tasks at the same assessment point, for example either a written or oral assessment, or by offering a range of different assessment tasks across the curriculum.</p> | <p>Current assessment diet offers a range of different assessment types across modules allowing all students an opportunity to be assessed on areas they consider to be a strength.</p> <p>When agreed, students registered with DDS can be offered alternative assignments, for example if they cannot take an exam.</p> <p>This approach to assessment is currently being reviewed as part of a university-based initiative.</p> |
| Curricula informed by employer and industry need | <p><u>Career management skills</u> Courses should provide support for the development of career management skills that enable student to be familiar with and understand relevant industries or professions, be able to build on work-related learning opportunities, understand the role of self-appraisal and planning for lifelong learning in career development, develop resilience and manage the career building process. This should be designed to inform the development of excellence and professionalism.</p> | <p>All students are allocated to an academic tutor. Tutors assist students to identify first steps to achieving career goals. In addition, to highlight some of the skills and experiences students need to acquire during their studies.</p> |
| Curricula informed by employer and | <p><u>Capstone project/dissertation</u> The level 6 project or dissertation is a critical point for the integration and</p> | <p>Students undertake an empirical project at level 6. The project relates to the content of the</p> |

Appendix C: Terminology

[Please provide a selection of definitions according to your own course and context to help prospective students who may not be familiar with terms used in higher education. Some examples are listed below]

| | |
|--------------------------------|---|
| awarding body | a UK higher education provider (typically a university) with the power to award higher education qualifications such as degrees |
| bursary | a financial award made to students to support their studies; sometimes used interchangeably with 'scholarship' |
| collaborative provision | a formal arrangement between a degree-awarding body and a partner organisation, allowing for the latter to provide higher education on behalf of the former |
| compulsory module | a module that students are required to take |
| contact hours | the time allocated to direct contact between a student and a member of staff through, for example, timetabled lectures, seminars and tutorials |
| coursework | student work that contributes towards the final result but is not assessed by written examination |

| | |
|---------------------------------|---|
| current students | students enrolled on a course who have not yet completed their studies or been awarded their qualification |
| delivery organisation | an organisation that delivers learning opportunities on behalf of a degree-awarding body |
| distance-learning course | a course of study that does not involve face-to-face contact between students and tutors |
| extracurricular | activities undertaken by students outside their studies |
| feedback (on assessment) | advice to students following their completion of a piece of assessed or examined work |
| formative assessment | a type of assessment designed to help students learn more effectively, to progress in their studies and to prepare for summative assessment; formative assessment does not contribute to the final mark, grade or class of degree awarded to students |

| | |
|-------------------------------------|--|
| higher education provider | organisations that deliver higher education |
| independent learning | learning that occurs outside the classroom that might include preparation for scheduled sessions, follow-up work, wider reading or practice, completion of assessment tasks, or revision |
| intensity of study | the time taken to complete a part-time course compared to the equivalent full-time version: for example, half-time study would equate to 0.5 intensity of study |
| lecture | a presentation or talk on a particular topic; in general lectures involve larger groups of students than seminars and tutorials |
| learning zone | a flexible student space that supports independent and social learning |
| material information | information students need to make an informed decision, such as about what and where to study |
| mode of study | different ways of studying, such as full-time, part-time, e-learning or work-based learning |
| modular course | a course delivered using modules |
| module | a self-contained, formally structured unit of study, with a coherent and explicit set of learning outcomes and assessment criteria; some providers use the word 'course' or 'course unit' to refer to individual modules |
| national teaching fellowship | a national award for individuals who have made an outstanding impact on student learning and the teaching profession |
| navigability (of websites) | the ease with which users can obtain the information they require from a website |
| optional module | a module or course unit that students choose to take |
| performance (examinations) | a type of examination used in performance-based subjects such as drama and music |
| professional body | an organisation that oversees the activities of a particular profession and represents the interests of its members |
| prospective student | those applying or considering applying for any programme, at any level and employing any mode of study, with a higher education provider |

| | |
|-----------------------------|--|
| regulated course | a course that is regulated by a regulatory body |
| regulatory body | an organisation recognised by government as being responsible for the regulation or approval of a particular range of issues and activities |
| scholarship | a type of bursary that recognises academic achievement and potential, and which is sometimes used interchangeably with 'bursary' |
| semester | either of the parts of an academic year that is divided into two for purposes of teaching and assessment (in contrast to division into terms) |
| seminar | seminars generally involve smaller numbers than lectures and enable students to engage in discussion of a particular topic and/or to explore it in more detail than might be covered in a lecture |
| summative assessment | formal assessment of students' work, contributing to the final result |
| term | any of the parts of an academic year that is divided into three or more for purposes of teaching and assessment (in contrast to division into semesters) |
| total study time | the total time required to study a module, unit or course, including all class contact, independent learning, revision and assessment |
| tutorial | one-to-one or small group supervision, feedback or detailed discussion on a particular topic or project |
| work/study placement | a planned period of experience outside the institution (for example, in a workplace or at another higher education institution) to help students develop particular skills, knowledge or understanding as part of their course |
| workload | see 'total study time' |
| written examination | a question or set of questions relating to a particular area of study to which candidates write answers usually (but not always) under timed conditions |
