	B. Cours	e Aims and Features					
Distinctive features of course	opportunity to grad oriented towards the year and second year and second year and second year the BSc (Hons). Level 4 that will proof the course, in acceptable of the course, in acceptable o	Hons) Psychology (Forensic Psychology) offers students the rtunity to graduate with a BPS-accredited undergraduate degree ted towards their particular interests in forensic psychology. In the first and second years of the course, students follow the same modules as e BSc (Hons) Psychology course with the exception of one module at 4 that will provide an introduction to forensic science. In the third year e course, in addition to two optional modules, students undertake a alised research project in the area of forensic and investigative hology and a taught module on incident investigation. There is also an rtunity in the third year for students to complete an assessed assional placement in an area related to forensic and investigative hology. Completion of this course will provide students with expertise in sic psychology, and awareness of broader issues within the forensic ces.					
		completion of this course students are not qualified to practise as a ensic Psychologist without further training in Forensic Psychology.					
Course Aims	<ol> <li>Provide stud and of psych facts, theorie</li> <li>Provide stud acquaint their this specialis</li> <li>Provide an uris informed b</li> <li>Provide stud and investigate ethically;</li> <li>Support and personal back the demands</li> <li>Ensure stude communication progression</li> <li>Provide prog</li> </ol>	ents with a grounding in the empirical study of behaviour cological processes and to acquaint them with the major are and debates in contemporary Psychology; ents with specific expertise in forensic psychology, and to m with the major theories and contemporary debates in st field; p-to-date curriculum that is delivered to a high quality and by scholarship and research; ents with the knowledge, skills and techniques to identify ate psychological issues and problems empirically and meet the needs of students from varied educational and exgrounds so that they have the best opportunity to meet of degree-level education; ents develop the core skills of critical thinking, ion, and employability, which provide a sound basis for into work and/or further study.					
Course Learning		will have knowledge and understanding of:					
Outcomes		ychology including evolutionary approaches and genetics, al basis of perception, learning and behaviour, brain					

AQE October 2017 Page 2 of 23

- functioning and neuroanatomy, synaptic transmission, neuropsychology and hormones.
- **A2** Cognitive psychology including perception, attention, memory, language, thinking, reasoning and decision-making.
- A3 Social psychology including social cognition, critical approaches to understanding social behaviour, interpersonal behaviour intrapersonal behaviour, group processes, social communication, social development, and intergroup relations and conflict.
- A4 Developmental psychology including cognitive and language development, social behaviour, emotional development and attachment.
- **A5** Individual differences including personality, intelligence, psychological testing, emotions and feelings, abnormal psychology and mental health.
- A6 Research methods and statistics including research design, quantitative methods, statistical analysis, inference and interpretation, qualitative analysis, and ethics in research design and conduct.
- **A7** Conceptual and historical issues in psychology including locating current approaches in the developing history of the discipline, defining principles of psychology, approaches to the study of behaviour and experience, and conceptual debates.
- **A8** Applied psychology encompassing principles of application to real world issues, with a particular focus on forensic psychology and forensic science.
  - b) Students will develop their intellectual skills such that they are able to:
- **B1** Integrate and evaluate multiple psychological perspectives, and to generate, explore, and evaluate research questions and empirical evidence, for theoretical and real world applications, using a diverse range of source material
  - c) Students will acquire and develop practical skills such that they are able to:
- **C1** Write, speak, and listen appropriately in a variety of environments and for a range of audiences, both independently and as part of a group.
  - d) Students will acquire and develop transferrable skills such that they are able to:
- **D1** Recognise, utilise and reflect upon those abilities which are relevant for successful employment in psychology-specific and other professions.

#### C. Teaching and Learning Strategy

- A1, A2, A3, A4, A5, A7 and A8 are all introduced in level 4. These core domains are delivered via a combination of lectures plus seminars or workshops in all levels. Topic areas are added and developed in level 5. In level 6 students specialise through a number of optional modules. In most level 4 seminars practical and/or interactive exercises that either support learning or enhance study skills are used. In levels 5 and 6 a variety of seminar, workshop, presentation, interactive and e-learning activities aim to help students develop their critical and analytical skills.

AQE October 2017 Page 3 of 23

- A6 is covered in a spine of modules running through levels 4 and 5. Topics are covered in a combination of lectures, seminars and practical classes. A major piece of empirical work, requiring working knowledge of this domain, is carried out in level 6.
- Directed reading is an important aspect of teaching and learning in all domains. The amount, sophistication and primary nature of the directed reading increases from level 4 through level 6.
- Critical thinking is developed in a scaffolded manner, such that students are provided with level appropriate guidance and signposting as outlined in the table below. Module outcomes have been developed to reflect these stepping stones.

Stepping Stones in the Development of Critical Thinking Skills								
	Level 4	Level 5	Level 6					
Knowledge and understanding	<ul> <li>Awareness that knowledge base is open to ongoing debate and reformulation</li> <li>Understands the difference between primary and secondary sources</li> </ul>	<ul> <li>Recognises the         weight of evidence in         supporting         perspectives</li> <li>Recognises that         perspectives/approa         ches can differ in the         quality of evidence         used to support         them</li> </ul>	Can relate the knowledge base to other fields of study					
Conceptualisation	<ul> <li>Identifies key concepts</li> <li>Identifies strengths and weaknesses of above</li> </ul>	<ul> <li>Recognises competing perspectives</li> </ul>	Can argue from competing perspectives					
Synthesis	<ul> <li>Collects information from a variety of sources</li> </ul>	Synthesises     information from a     variety of sources	Applies knowledge in unfamiliar contexts					
Evaluation	Judges the reliability     of data	<ul> <li>Compare methods and techniques</li> <li>Can select appropriate methods for evaluation</li> </ul>	Sophisticated     explanation for     contradictory     data/evidence					

- There is a focus on the explicit teaching of written, spoken, and listening based communication skills at level 4. This is then further developed at levels 5 and 6.
- We have placed employability at the heart of our psychology courses. To this end, the teaching
  and learning strategy will ensure that students are aware of skills development in relation to future
  employment (e.g. through personal developmental programmes, academic tutoring, clear
  signposting of skills development within modules, career and skills development opportunities from
  the Division and central services).

#### D. Assessment

Assessment is varied. Summative assessments at levels 5 and 6 are generally assessed with a combination of examination and coursework. Coursework activities vary from essays through to a commentary on a persuasive communication, applied reports and research reports.

AQE October 2017 Page 4 of 23

Examination formats vary. Some use multiple choice questions, short answer questions, essays and tests of statistical knowledge and reasoning

Formative assessment using traditional and e-learning tools are built in to all modules.

Critical thinking is assessed in all modules, at the appropriate level (see above table). Summative assessment of critical thinking only occurs after formative assessment; therefore, a large component of formative assessment of critical thinking takes place at level 4, with summative assessment taking place increasingly at levels 5 and 6.

Communication skills are assessed in all modules, at the appropriate level. Summative assessment of communication skills only occurs after formative assessment; therefore, a large component of formative assessment of communication skills takes place at level 4, with summative assessment taking place increasingly at levels 5 and 6.

Assessment of employability skills is a mixture of formative and summative assessment in modules across all levels. Employability skills are also supported and developed via academic tutoring, and as such are formatively assessed outside taught modules.

#### E. Academic Regulations

The University's Academic Regulations apply for this course. Any course specific protocols will be identified here.

#### F. Entry Requirements

The standard entry requirement for students (under 21 years old on Sept 1st) is 120 UCAS points plus 5 passes at GCSE level at grade C or above (reformed GCSEs Grade 4 or above) which must include English Language and Mathematics.

Applicants can be admitted if they pass the Access to HE Diploma with a minimum of 24 Distinctions and 21 Merits

Credit may be given for prior learning via APL at level 4 only and in accordance with the policies set by LSBU.

#### G. Course structure(s)

#### **Course overview**

Awards are given in accordance with current London South Bank University Academic Regulations for Taught Programmes. Students are required to do six psychology modules in each of Levels 4, 5 and 6. All psychology modules in Levels 4 and 5 are compulsory. At Level 6 there is a combination of compulsory and optional modules depending on route. See below. The programme confers professional certification by the British Psychological Society (GBC) on graduates and the modules required for GBC are indicated below.

The Empirical Project module is exempt from the compensated pass regulation. To obtain GBC students have to pass the modules indicated in the curriculum below, with an overall degree classification of 2:2 or above:

#### **Placements information**

Students have the option of taking the placement module at level 6. Students will find their own placements.

#### **H. Course Modules**

- Level 6 optional modules are subject to change depending on staffing and availability.
  - Should an optional module need to be changed, students will be notified by email and also in person at lectures as appropriate. If the change occurs after students have selected their module options, students will be offered the opportunity to switch to another module of their choice.

## I. Timetable information

Exact timetables will be communicated to students before each semester starts.

- The full-time course is taught over three half days per teaching week

Page 10 of 23 AQE October 2017

- The part-time 4.5 year course is taught over 2 half days per teaching week
- The part-time 6 year course is taught over 1 or 2 half days per teaching week

#### J. Costs and financial support

#### Course related costs

- There are no specific additional course-related costs for this course

#### Tuition fees/financial support/accommodation and living costs

- Information on tuition fees/financial support can be found by clicking on the following link http://www.lsbu.ac.uk/courses/undergraduate/fees-and-funding or
- http://www.lsbu.ac.uk/courses/postgraduate/fees-and-funding
- Information on living costs and accommodation can be found by clicking the following linkhttps://my.lsbu.ac.uk/my/portal/Student-Life-Centre/International-Students/Starting-at-LSBU/#expenses

#### **List of Appendices**

Appendix A: Curriculum Map

Appendix B: Educational Framework (undergraduate courses)

Appendix C: Personal Development Planning (postgraduate courses)

Appendix D: Terminology

AQE October 2017 Page 11 of 23

#### Appendix A: Curriculum Map

This map provides a design aid to help course teams identify where course outcomes are being developed, taught and assessed within the course. It also provides a checklist for quality assurance purposes and may be used in validation, accreditation and external examining processes. Making the learning outcomes explicit will also help students to monitor their own learning and development as the course progresses.

A = Assessed (Summative), T = Taught, D = Developed. \* = depending on topic chosen. \*\* Additional learning outcomes addressed are: TDA (B4 & B6); D (B5 & B7).

\*\*\* Additional learning outcomes addressed are: TDA (B3,B4,B6, B7, D1, D2, D4, D5, & D8); and TD (D3, D6, D9)

Note: All modules are 20 credits except the Empirical Project, which is 40 credits.

# Appendix B: Embedding the Educational Framework for Undergraduate Courses

The Educational Framework at London South Bank University is a set of principles for curriculum design and the wider student experience that articulate our commitment to the highest standards of academic knowledge and understanding applied to the challenges of the wider world.

The Educational Framework reflects our status as University of the Year for Graduate Employment awarded by *The Times and The Sunday Times Good University Guide 2018* and builds on our 125 year history as a civic university committed to fostering social mobility through employability and enterprise, enabling our students to translate academic achievement into career success.

There are four key characteristics of LSBU's distinctive approach to the undergraduate curriculum and student experience:

- Develop students' professional and vocational skills through application in industrystandard facilities
- Develop our students' graduate attributes, self-awareness and behaviours aligned to our EPIIC values
- Integrate opportunities for students to develop their confidence, skills and networks into the curriculum
- Foster close relationships with employers, industry, and Professional, Statutory and Regulatory Bodies that underpin our provision (including the opportunity for placements, internships and professional opportunities)

The dimensions of the Educational Framework for curriculum design are:

- **informed by employer and industry** needs as well as professional, statutory and regulatory body requirements
- **embedded learning development** for all students to scaffold their learning through the curriculum taking into account the specific writing and thinking requirements of the discipline/profession
- high impact pedagogies that enable the development of student professional and vocational learning through application in industry-standard or authentic workplace contexts
- inclusive teaching, learning and assessment that enables all students to access and engage the course
- assessment for learning that provides timely and formative feedback

All courses should be designed to support these five dimensions of the Educational Framework. Successful embedding of the Educational Framework requires a systematic approach to course design and delivery that conceptualises the student experience of the curriculum as a whole rather than at modular level and promotes the progressive development of understanding over the entire course. It also builds on a well-established evidence base across the sector for the pedagogic and assessment experiences that contribute to high quality learning.

AQE October 2017 Page **14** of **23** 

This appendix to the course specification document enables course teams to evidence how their courses meet minimum expectations, at what level where appropriate, as the basis for embedding the Educational Framework in all undergraduate provision at LSBU.

Dimension of Minimum expectations and rationale		How this is achieved in the
the		course
Educational Framework		
Curricula informed by employer and industry need	Outcomes focus and professional/employer links All LSBU courses will evidence the involvement of external stakeholders in the curriculum design process as well as plan for the participation of employers and/or alumni through guest lectures or Q&A sessions, employer panels, employer-generated case studies or other input of expertise into the delivery of the course provide students with access to current workplace examples and role models. Students should have access to employers and/or alumni in at least one module at level 4.	The psychology components of the programme are based upon the BPS framework for teaching undergraduate psychology courses. The forensic science components are taken from the BSc Forensic Science Course which is mapped to requirements for Accreditation by the Chartered Society of Forensic Sciences.  Lectures delivered by guest lecturer psychologists are included within the curriculum at level 4.  Students are encouraged to join the British Psychological Society, with 1 year of student membership provided by the Division of Psychology.
Embedded learning development	Support for transition and academic preparedness At least two modules at level 4 should include embedded learning development in the curriculum to support student understanding of, and familiarity with, disciplinary ways of thinking and practising (e.g. analytical thinking, academic writing, critical reading, reflection). Where possible, learning development will be normally integrated into content modules rather than as standalone modules. Other level 4 modules should reference and reinforce the learning development to aid in the transfer of learning.	All level 4 modules contain embedded learning development of key academic skills using a variety of teaching methods.
High impact	Group-based learning experiences	A scaffolding approach to group-
pedagogies		based learning is taken from level

	communication practices in the	
	discipline is fundamental to applied	
	subject knowledge. This involves	
	explicitly defining the features of	
	disciplinary thinking and practices,	
	finding opportunities to scaffold student	
	attempts to adopt these ways of	
	thinking and practising and providing	
	opportunities to receive formative	
	feedback on this. A writing in the	
	disciplines approach recognises that	
	writing is not a discrete representation	
	of knowledge but integral to the	
	process of knowing and understanding	
	in the discipline. It is expected that	
	assessment utilises formats that are	
	recognisable and applicable to those	
	working in the profession. For example,	

AQE October 2017 Page 18 of 23

		,
	project report, presentation, poster, lab or field report, journal or professional article, position paper, case report, handbook, exhibition guide.	
High impact pedagogies	Multi-disciplinary, interdisciplinary or interprofessional group-based learning experiences Building on experience of group working at level 4, at level 5 students should be provided with the opportunity to work and manage more complex tasks in groups that work across traditional disciplinary and professional boundaries and reflecting interprofessional work-place settings. Learning in multi- or interdisciplinary groups creates the opportunity for the development of student outcomes including inclusivity, communication and networking.	Students have the opportunity to take a professional placement module at level 6, also linked to assessment.
Assessment for learning	Variation of assessment An inclusive approach to curriculum recognises diversity and seeks to create a learning environment that enables equal opportunities for learning for all students and does not give those with a particular prior qualification (e.g. A-level or BTEC) an advantage or disadvantage. An holistic assessment strategy should provide opportunities for all students to be able to demonstrate achievement of learning outcomes in different ways throughout the course. This may be by offering alternate assessment tasks at the same assessment point, for example either a written or oral assessment, or by offering a range of different assessment tasks across the curriculum.	Current assessment diet offers a range of different assessment types across modules allowing all students an opportunity to be assessed on areas they consider to be a strength.  When agreed, students registered with DDS can be offered alternative assignments, for example if they cannot take an exam.  This approach to assessment is currently being reviewed as part of a university-based initiative.
Curricula informed by employer and industry need	Career management skills Courses should provide support for the development of career management skills that enable student to be familiar with and understand relevant industries or professions, be able to build on work-related learning opportunities, understand the role of self-appraisal and planning for lifelong learning in	All students are allocated to an academic tutor. Tutors assist students to identify first steps to achieving career goals. In addition, to highlight some of the skills and experiences students need to acquire during their studies.

AQE October 2017 Page 19 of 23

	career development, develop resilience and manage the career building	
	process. This should be designed to	
	inform the development of <b>excellence</b>	
	and professionalism.

#### **Appendix C: Terminology**

[Please provide a selection of definitions according to your own course and context to help prospective students who may not be familiar with terms used in higher education. Some examples are listed below]

awarding body	a UK higher education provider (typically a university) with the power to award higher education qualifications such as degrees
bursary	a financial award made to students to support their studies; sometimes used interchangeably with 'scholarship'
collaborative provision	a formal arrangement between a degree-awarding body and a partner organisation, allowing for the latter to provide higher education on behalf of the former
compulsory module	a module that students are required to take
contact hours	the time allocated to direct contact between a student and a member of staff through, for example, timetabled lectures, seminars and tutorials
coursework	student work that contributes towards the final result but is not assessed by written examination
current students	students enrolled on a course who have not yet completed their studies or been awarded their qualification

AQE October 2017 Page 20 of 23

delivery organisation	an organisation that delivers learning opportunities on behalf of a degree-awarding body
distance-learning course	a course of study that does not involve face-to-face contact between students and tutors
extracurricular	activities undertaken by students outside their studies
feedback (on assessment)	advice to students following their completion of a piece of assessed or examined work
formative assessment	a type of assessment designed to help students learn more effectively, to progress in their studies and to prepare for summative assessment; formative assessment does not contribute to the final mark, grade or class of degree awarded to students

AQE October 2017 Page 21 of 23

higher education provider	organisations that deliver higher education
independent learning	learning that occurs outside the classroom that might include preparation for scheduled sessions, follow-up work, wider reading or practice, completion of assessment tasks, or revision
intensity of study	the time taken to complete a part-time course compared to the equivalent full-time version: for example, half-time study would equate to 0.5 intensity of study
lecture	a presentation or talk on a particular topic; in general lectures involve larger groups of students than seminars and tutorials
learning zone	a flexible student space that supports independent and social earning
material information	information students need to make an informed decision, such as about what and where to study
mode of study	different ways of studying, such as full-time, part-time, e-learning or work-based learning
modular course	a course delivered using modules
module	a self-contained, formally structured unit of study, with a coherent and explicit set of learning outcomes and assessment criteria; some providers use the word 'course' or 'course unit' to refer to individual modules
national teaching fellowship	a national award for individuals who have made an outstanding impact on student learning and the teaching profession
navigability (of websites)	the ease with which users can obtain the information they require from a website
optional module	a module or course unit that students choose to take
performance (examinations)	a type of examination used in performance- based subjects such as drama and music
professional body	an organisation that oversees the activities of a particular profession and represents the interests of its members
prospective student	those applying or considering applying for any programme, at any level and employing any mode of study, with a higher education provider

AQE October 2017 Page 22 of 23

regulated course	a course that is regulated by a regulatory body
regulatory body	an organisation recognised by government as being responsible for the regulation or approval of a particular range of issues and activities
scholarship	a type of bursary that recognises academic achievement and potential, and which is sometimes used interchangeably with 'bursary'
semester	either of the parts of an academic year that is divided into two for purposes of teaching and assessment (in contrast to division into terms)
seminar	seminars generally involve smaller numbers than lectures and enable students to engage in discussion of a particular topic and/or to explore it in more detail than might be covered in a lecture
summative assessment	formal assessment of students' work, contributing to the final result
term	any of the parts of an academic year that is divided into three or more for purposes of teaching and assessment (in contrast to division into semesters)
total study time	the total time required to study a module, unit or course, including all class contact, independent learning, revision and assessment
tutorial	one-to-one or small group supervision, feedback or detailed discussion on a particular topic or project
work/study placement	a planned period of experience outside the institution (for example, in a workplace or at another higher education institution) to help students develop particular skills, knowledge or understanding as part of their course
workload	see 'total study time'
written examination	a question or set of questions relating to a particular area of study to which candidates write answers usually (but not always) under timed conditions
