The BSc (Hons) Psychology aims to: 1. Provide students with a grounding in the empirical study of behaviour and of psychological processes and to acquaint them with the major facts, theories and debates in contemporary Psychology; 2. Provide an up-to-date curriculum that is delivered to a high quality and is informed by scholarship and research; 3. Provide students with the knowledge, skills and techniques to identify and investigate psychological issues and problems empirically and ethically; 4. Support and meet the needs of students from varied educational and personal backgrounds so that they have the best opportunity to meet the demands of degree- level education; 5. Ensure students develop the core skills of critical thinking, communication, and employability, which provide a sound basis for progression into work and/or further study. 6. Provide programmes of study that lead to Graduate Membership and eligibility for the Graduate Basis for Chartered membership with the BPS. A2 Cognitive psychology including evolutionary approaches and genetics, the biological basis of perception, learning and behaviour, brain functioning and neuroanatomy, synaptic

- A7 Conceptual and historical issues in psychology including locating current approaches in the developing history of the discipline, defining principles of psychology, approaches to the study of behaviour and experience, and conceptual debates.
- A8 Applied psychology encompassing principles of application to real world issues, with a particular focus on addiction.
 - b) Students will develop their intellectual skills such that they are able to:
- **B1** Integrate and evaluate multiple psychological perspectives, and to generate, explore, and evaluate research questions and empirical evidence, for theoretical and real world applications, using a diverse range of source material
 - c) Students will acquire and develop practical skills such that they are able to:
- **C1** Write, speak, and listen appropriately in a variety of environments and for a range of audiences, both independently and as part of a group.
 - d) Students will acquire and develop transferrable skills such that they are able to:
 - **D1** Recognise, utilise and reflect upon those abilities which are relevant for successful employment in psychology-specific and other professions.

C. Teaching and Learning Strategy

- A1, A2, A3, A4, A5, A7, and A8 are all introduced in level 4. These core domains are delivered via a combination of lectures plus seminars or workshops in all levels. Topic areas are added and developed in level 5. In level 6 students specialise through a number of optional modules. In most level 4 seminars practical and/or interactive exercises that either support learning or enhance study skills are used. In levels 5 and 6 a variety of seminar, workshop, presentation, interactive and e-learning activities aim to help students develop their critical and analytical skills.
- A6 is covered in a spine of modules running through levels 4 and 5. Topics are covered in a combination of lectures, seminars and practical classes. A major piece of empirical work, requiring working knowledge of this domain, is carried out in level 6.
- Directed reading is an important aspect of teaching and learning in all domains. The amount, sophistication and primary nature of the directed reading increases from level 4 through level 6.
- Critical thinking is developed in a scaffolded manner, such that students are provided with level
 appropriate guidance and signposting as outlined in the table below. Module outcomes have been
 developed to reflect these stepping stones.

Stepping Stones in the Dev	Stepping Stones in the Development of Critical Thinking Skills							
	Level 4	Level 5	Level 6					
Knowledge and understanding	 Awareness that knowledge base is open to ongoing debate and reformulation Understands the difference between primary and secondary sources 	 Recognises the weight of evidence in supporting perspectives Recognises that perspectives/approache s can differ in the quality of evidence used to support them 	Can relate the knowledge base to other fields of study					
Conceptualisation	Identifies key conceptsIdentifies strengths and weaknesses of above	Recognises competing perspectives	Can argue from competing perspectives					

AQE October 2017 Page 3 of 17

Synthesis	•	Collects information from a variety of sources	•	Synthesises information from a variety of sources	•	Applies knowledge in unfamiliar contexts
Evaluation	•	Judges the reliability of data	•	Compare methods and techniques Can select appropriate methods for evaluation	•	Sophisticated explanation for contradictory data/evidence

- There is a focus on the explicit teaching of written, spoken, and listening based communication skills at level 4. This is then further developed at levels 5 and 6.
- We have placed employability at the heart of our psychology courses. To this end, the teaching and learning strategy will ensure that students are aware of skills development in relation to future employment (e.g. through personal developmental programmes, academic tutoring, clear signposting of skills development within modules, career and skills development opportunities from the Division and central services).

D. Assessment

- Assessment is varied. Summative assessments at levels 5 and 6 are generally assessed with a combination
 of examination and coursework. Coursework activities vary from essays through to a commentary on a
 persuasive communication, applied reports and research reports.
- Examination formats vary. Some use multiple choice questions, short answer questions, essays and tests of statistical knowledge and reasoning
- Formative assessment using traditional and e-learning tools are built in to all modules.
- Critical thinking is assessed in all modules, at the appropriate level (see above table). Summative assessment of critical thinking only occurs after formative assessment; therefore, a large component of formative assessment of critical thinking takes place at level 4, with summative assessment taking place increasingly at levels 5 and 6.
- Communication skills are assessed in all modules, at the appropriate level. Summative assessment of
 communication skills only occurs after formative assessment; therefore, a large component of formative
 assessment of communication skills takes place at level 4, with summative assessment taking place
 increasingly at levels 5 and 6.
- Assessment of employability skills is a mixture of formative and summative assessment in modules across all levels. Employability skills are also supported and developed via academic tutoring, and as such are formatively assessed outside taught modules.

E. Academic Regulations

The University's Academic Regulations apply for this course. Any course specific protocols will be identified here.

https://www.lsbu.ac.uk/about-us/policies-regulations-procedures

AQE October 2017 Page 4 of 17

F. Entry Requirements

The standard entry requirement for students (under 21 years old on Sept 1st) is 120 UCAS points plus 5 passes at GCSE level at grade C or above (reformed GCSEs Grade 4 or above) which must include English Language and Mathematics.

Applicants can be admitted if they pass the Access to HE Diploma with a minimum of 24 Distinctions and 21 Merits

Credit may be given for prior learning via APL at level 4 only and in accordance with the policies set by LSBU.

G. Course structure(s)

Course overview

Awards are given in accordance with current London South Bank University Academic Regulations for Taught Programmes. Students are required to do six psychology modules in each of Levels 4, 5 and 6. All psychology modules in Levels 4 and 5 are compulsory. At Level 6 there is a combination of compulsory and optional modules depending on route. See below. The programme confers professional certification by the British Psychological Society (GBC) on graduates and the modules required for GBC are indicated below. To obtain GBC students have to pass the modules indicated in the curriculum below, with an overall degree classification of 2:2 or above.

The Empirical Project module is exempt from the compensated pass regulation.

Placements information

Students have the option of taking the placement module at level 6. Students will find their own placements.

H. Course Modules

- Level 6 optional modules are subject to change depending on staffing and availability.
 - Should an optional module need to be changed, students will be notified by email and also in person at lectures as appropriate. If the change occurs after students have selected their module options, students will be offered the opportunity to switch to another module of their choice.

I. Timetable information

Exact timetables will be communicated to students before each semester starts.

- The full-time course is taught over three half days per teaching week
- The part-time 4.5 year course is taught over 2 half days per teaching week
- The part-time 6 year course is taught over 1 or 2 half days per teaching week

J. Costs and financial support

Course related costs

- There are no specific additional course-related costs for this course

Tuition fees/financial support/accommodation and living costs

Information on tuition fees/financial support can be found by clicking on the following link:

http://www.lsbu.ac.uk/study/undergraduate/fees-and-funding or

http://www.lsbu.ac.uk/study/postgraduate/fees-and-funding

Information on living costs and accommodation can be found by clicking the following link: https://www.lsbu.ac.uk/student-life/our-campuses/southwark/cost-of-living

List of Appendices

Appendix A: Curriculum Map Appendix B: Terminology

AQE October 2017 Page 12 of 17

Appendix A: Curriculum Map

This map provides a design aid to help course teams identify where course outcomes are being developed, taught and assessed within the course. It also provides a checklist for quality assurance purposes and may be used in validation, accreditation and external examining processes. Making the learning outcomes explicit will also help students to monitor their own learning and development as the course progresses.

A = Assessed (Summative), T = Taught, D = Developed. * = depending on topic chosen. # = new modules in 21/22 awaiting verification of outcomes which are taught, developed, and assessed. Note: All modules are 20 credits except the Empirical Project, which is 40 credits.

Appendix B: Terminology

[Please provide a selection of definitions according to your own course and context to help prospective students who may not be familiar with terms used in higher education. Some examples are listed below]

awarding body	a UK higher education provider (typically a
g,	university) with the power to award higher education qualifications such as degrees
bursary	a financial award made to students to support their studies; sometimes used interchangeably with 'scholarship'
collaborative provision	a formal arrangement between a degree-awarding body and a partner organisation, allowing for the latter to provide higher education on behalf of the former
compulsory module	a module that students are required to take
contact hours	the time allocated to direct contact between a student and a member of staff through, for example, timetabled lectures, seminars and tutorials
coursework	student work that contributes towards the final result but is not assessed by written examination
current students	students enrolled on a course who have not yet completed their studies or been awarded their qualification
delivery organisation	an organisation that delivers learning opportunities on behalf of a degree-awarding body
distance-learning course	a course of study that does not involve face-to-face contact between students and tutors
extracurricular	activities undertaken by students outside their studies
feedback (on assessment)	advice to students following their completion of a piece of assessed or examined work
formative assessment	a type of assessment designed to help students learn more effectively, to progress in their studies and to prepare for summative assessment; formative assessment does not contribute to the final mark, grade or class of degree awarded to students

AQE October 2017 Page 15 of 17

higher education provider	organisations that deliver higher education
independent learning	learning that occurs outside the classroom that might include preparation for scheduled sessions, follow-up work, wider reading or practice, completion of assessment tasks, or revision
intensity of study	the time taken to complete a part-time course compared to the equivalent full-time version: for example, half-time study would equate to 0.5 intensity of study
lecture	a presentation or talk on a particular topic; in general lectures involve larger groups of students than seminars and tutorials
learning zone	a flexible student space that supports independent and social earning
material information	information students need to make an informed decision, such as about what and where to study
mode of study	different ways of studying, such as full-time, part-time, e-learning or work-based learning
modular course	a course delivered using modules
module	a self-contained, formally structured unit of study, with a coherent and explicit set of learning outcomes and assessment criteria; some providers use the word 'course' or 'course unit' to refer to individual modules
national teaching fellowship	a national award for individuals who have made an outstanding impact on student learning and the teaching profession
navigability (of websites)	the ease with which users can obtain the information they require from a website
optional module	a module or course unit that students choose to take
performance (examinations)	a type of examination used in performance- based subjects such as drama and music
professional body	an organisation that oversees the activities of a particular profession and represents the interests of its members
prospective student	those applying or considering applying for any programme, at any level and employing any mode of study, with a higher education provider

AQE October 2017 Page 16 of 17

regulated course	a course that is regulated by a regulatory body
regulatory body	an organisation recognised by government as being responsible for the regulation or approval of a particular range of issues and activities
scholarship	a type of bursary that recognises academic achievement and potential, and which is sometimes used interchangeably with 'bursary'
semester	either of the parts of an academic year that is divided into two for purposes of teaching and assessment (in contrast to division into terms)
seminar	seminars generally involve smaller numbers than lectures and enable students to engage in discussion of a particular topic and/or to explore it in more detail than might be covered in a lecture
summative assessment	formal assessment of students' work, contributing to the final result
term	any of the parts of an academic year that is divided into three or more for purposes of teaching and assessment (in contrast to division into semesters)
total study time	the total time required to study a module, unit or course, including all class contact, independent learning, revision and assessment
tutorial	one-to-one or small group supervision, feedback or detailed discussion on a particular topic or project
work/study placement	a planned period of experience outside the institution (for example, in a workplace or at another higher education institution) to help students develop particular skills, knowledge or understanding as part of their course
workload	see 'total study time'
written examination	a question or set of questions relating to a particular area of study to which candidates write answers usually (but not always) under timed conditions
