	B. Course Aims and Features
Distinctive features of course	The BSc (Hons) Psychological Counselling offers students the opportunity to graduate with a British Psychological Society (BPS) accredited undergraduate degree and an industry recognised certification in counselling skills and studies from the Counselling and Psychotherapy Central Awarding Body (CPCAB. The Psychology component of this course is, to our knowledge, the first in the UK that teaches the core curriculum from a holistic perspective so students fully appreciate how different areas of psychology (biological, cognitive, individual differences, developmental, social and conceptual and historical issues) integrate to facilitate greater understanding of human behaviour.
Course Aims	<ol> <li>The BSc (Hons) Psychological Counselling aims to:         <ol> <li>Provide students with a grounding in the empirical study of behaviour and of psychological processes and to acquaint them with the major facts, theories and debates in contemporary Psychology;</li> <li>Provide students with specific expertise in the study and practice of counselling skills from a psychological perspective, and to acquaint them with the major theories and contemporary debates in this specialist field;</li> <li>Provide an up-to-date curriculum that is delivered to a high quality and is informed by scholarship and research;</li> <li>Provide students with the knowledge, skills and techniques to identify and investigate psychological issues and problems empirically and ethically;</li> <li>Support and meet the needs of students from varied educational and personal backgrounds so that they have the best opportunity to meet the demands of degree-level education;</li> <li>Ensure students develop the core skills of critical thinking, communication, and employability, which provide a sound basis for progression into work and/or further study.</li> </ol> </li> <li>Provide counselling modules that taken in combination can lead to certification in counselling skills by CPCAB and can be used towards entry to counselling training courses.</li> </ol>
Course	a) Students will have knowledge and understanding of:
Learning Outcomes	<ul> <li>A1 Biological psychology including evolutionary approaches and genetics, the biological basis of perception, learning and behaviour, brain functioning and neuroanatomy, synaptic transmission, neuropsychology and hormones.</li> <li>A2 Cognitive psychology including perception, attention, memory, language, thinking, reasoning and decision-making.</li> <li>A3 Social psychology including social cognition, critical approaches to understanding social behaviour, interpersonal behaviour intrapersonal behaviour, group processes, social communication, social development, and intergroup relations and conflict.</li> <li>A4 Developmental psychology including cognitive and language development, social behaviour, emotional development and attachment.</li> <li>A5 Individual differences including personality, intelligence, psychological testing, emotions and feelings, abnormal psychology and mental health.</li> </ul>

	<ul> <li>A6 Research methods and statistics including research design, quantitative methods, statistical analysis, inference and interpretation, qualitative analysis, and ethics in research design and conduct.</li> <li>A7 Conceptual and historical issues in psychology including locating current approaches in the developing history of the discipline, defining principles of psychology, approaches to the study of behaviour and experience, and conceptual debates.</li> <li>A8 Applied psychology encompassing principles of application to real world issues, with a particular focus on counselling skills and studies.</li> <li>A9 The importance of skilled interpersonal communication for effective counselling practice.</li> <li>A10 The importance of counselling theory and knowledge of contextual issues for effective counselling practice</li> </ul>
	b) Students will develop their intellectual skills such that they are able to:
	<b>B1</b> The ability to integrate and evaluate multiple psychological perspectives, and to generate, explore, and evaluate research questions and empirical evidence, for theoretical and real world applications, using a diverse range of source material.
	c) Students will acquire and develop practical skills such that they are able to:
	<b>C1</b> These focus on the ability to write, speak, and listen appropriately in a variety of environments and for a range of audiences, both independently and as part of a group.
	<ul> <li>d) Students will acquire and develop transferrable skills such that they are able to:</li> </ul>
	<b>D1</b> The ability to recognise, utilise and reflect upon those abilities which are relevant for successful employment in psychology-specific and other professions.
	C. Teaching and Learning Strategy
<ul> <li>via a combination level 5. In level 6 and/or interactive variety of seminar their critical and a</li> <li>A6 is cove combination of leo knowledge of this</li> <li>Directed re sophistication and</li> <li>Critical thinking</li> </ul>	ered in a spine of modules running through levels 4 and 5. Topics are covered in a ctures, seminars and practical classes. A major piece of empirical work, requiring working domain, is carried out in level 6. eading is an important aspect of teaching and learning in all domains. The amount, d primary nature of the directed reading increases from level 4 through level 6.
guidance and	signposting as outlined in the table below. Module outcomes have been developed to reflect

	Level 4	Level 5	Level 6
Knowledge and understanding	<ul> <li>Awareness that knowledge base is open to ongoing debate and reformulation</li> <li>Understands the difference between primary and secondary sources</li> </ul>	<ul> <li>Recognises the weight of evidence in supporting perspectives</li> <li>Recognises that perspectives/approaches can differ in the quality of evidence used to support them</li> </ul>	<ul> <li>Can relate the knowledge base to other fields of study</li> </ul>
Conceptualisatior	<ul> <li>Identifies key concepts</li> <li>Identifies strengths and weaknesses of above</li> </ul>	<ul> <li>Recognises competing perspectives</li> </ul>	<ul> <li>Can argue from competing perspectives</li> </ul>
Synthesis	Collects information from a variety of sources	<ul> <li>Synthesises information from a variety of sources</li> </ul>	<ul> <li>Applies knowledge in unfamiliar contexts</li> </ul>
Evaluation	<ul> <li>Judges the reliability of data</li> </ul>	<ul> <li>Compare methods and techniques</li> <li>Can select appropriate methods for evaluation</li> </ul>	<ul> <li>Sophisticated explanation for contradictory data/evidence</li> </ul>

• There is a focus on the explicit teaching of written, spoken, and listening based communication skills at level 4. This is then further developed at levels 5 and 6.

 We have placed employability at the heart of our psychology courses. To this end, the teaching and learning strategy will ensure that students are aware of skills development in relation to future employment (e.g. through personal/academic tutoring, further development of our existing dedicated employability initiatives, clear signposting of skills development within modules, career and skills development opportunities from the school and central services).

# D. Assessment

Assessment is varied. Summative assessments at levels 4, 5 and 6 are generally assessed with either coursework, examination or a combination of both. Coursework activities vary from essays through to a commentary on a persuasive communication, applied reports and research reports.

Examination formats vary. Some use multiple choice questions, short answer questions, essays and tests of statistical knowledge and reasoning

Formative assessment using traditional and e-learning tools are built in to all modules.

Critical thinking is assessed in all modules, at the appropriate level (see above table). Summative assessment of critical thinking only occurs after formative assessment; therefore, a large component of formative assessment of critical thinking takes place at level 4, with summative assessment taking place increasingly at levels 5 and 6.

Communication skills are assessed in all modules, at the appropriate level. Summative assessment of communication skills only occurs after formative assessment; therefore, a large component of formative

assessment of communication skills takes place at level 4, with summative assessment taking place increasingly at levels 5 and 6.

Assessment of employability skills is a mixture of formative and summative assessment in modules across all levels. Employability skills are also supported and developed via personal/academic tutoring, and as such are formatively assessed outside taught modules.

### E. Academic Regulations

The University's Academic Regulations apply for this course.

#### F. Entry Requirements

The standard entry requirement for students (under 21 years old on Sept 1st) is 120 UCAS points plus 5 passes at GCSE level at grade C or above (reformed GCSEs Grade 4 or above) which must include English Language and Mathematics (or equivalent).

Applicants can be admitted if they pass the Access to HE Diploma with a minimum of 24 Distinctions and 21 Merits.

Credit may be given for prior learning via APL at level 4 only and in accordance with the policies set by LSBU.

# List of Appendices

- Appendix A: Curriculum Map
- Appendix B: Educational Framework (undergraduate courses)
- Appendix C: Personal Development Planning (postgraduate courses)

Appendix D: Terminology

#### Appendix A: Curriculum Map

This map provides a design aid to help course teams identify where course outcomes are being developed, taught and assessed within the course. It also provides a checklist for quality assurance purposes and may be used in validation, accreditation and external examining processes. Making the learning outcomes explicit will also help students to monitor their own learning and development as the course progresses.

## Appendix B: Embedding the Educational Framework for Undergraduate Courses

The Educational Framework at London South Bank University is a set of principles for curriculum design and the wider student experience that articulate our commitment to the highest standards of academic knowledge and understanding applied to the challenges of the wider world.

The Educational Framework reflects our status as University of the Year for Graduate Employment awarded by *The Times and The Sunday Times Good University Guide 2018* and builds on our 125 year history as a civic university committed to fostering social mobility through employability and enterprise, enabling our students to translate academic achievement into career success.

There are four key characteristics of LSBU's distinctive approach to the undergraduate curriculum and student experience:

- Develop students' professional and vocational skills through application in industrystandard facilities
- Develop our students' graduate attributes, self-awareness and behaviours aligned to our EPIIC values
- Integrate opportunities for students to develop their confidence, skills and networks into the curriculum
- Foster close relationships with employers, industry, and Professional, Statutory and Regulatory Bodies that underpin our provision (including the opportunity for placements, internships and professional opportunities)

The dimensions of the Educational Framework for curriculum design are:

- **informed by employer and industry** needs as well as professional, statutory and regulatory body requirements
- **embedded learning development** for all students to scaffold their learning through the curriculum taking into account the specific writing and thinking requirements of the discipline/profession
- **high impact pedagogies** that enable the development of student professional and vocational learning through application in industry-standard or authentic workplace contexts
- inclusive teaching, learning and assessment that enables all students to access and engage the course
- **assessment** *for* **learning** that provides timely and formative feedback

All courses should be designed to support these five dimensions of the Educational Framework. Successful embedding of the Educational Framework requires a systematic approach to course design and delivery that conceptualises the student experience of the curriculum as a whole rather than at modular level and promotes the progressive development of understanding over the entire course. It also builds on a well-established evidence base across the sector for the pedagogic and assessment experiences that contribute to high quality learning.

This appendix to the course specification document enables course teams to evidence how their courses meet minimum expectations, at what level where appropriate, as the basis for embedding the Educational Framework in all undergraduate provision at LSBU.

Dimension of the Educational Framework	Minimum expectations and rationale	How this is achieved in the course
Curricula informed by employer and industry need	Outcomes focus and professional/employer links All LSBU courses will evidence the involvement of external stakeholders in the curriculum design process as well as plan for the participation of employers and/or alumni through guest lectures or Q&A sessions, employer panels, employer-generated case studies or other input of expertise into the delivery of the course provide students with access to current workplace examples and role models. Students should have access to employers and/or alumni in at least one module at level 4.	The psychology components are based upon the BPS framework for teaching UG psychology courses. The counselling components of the course have been based upon the CPCAB framework, an industry standard. The course was designed by an accredited and experienced psychotherapist and all teaching content by counselling psychologists and psychotherapists.
Embedded learning development	Support for transition and academic preparedness At least two modules at level 4 should include embedded learning development in the curriculum to support student understanding of, and familiarity with, disciplinary ways of thinking and practising (e.g. analytical thinking, academic writing, critical reading, reflection). Where possible, learning development will be normally integrated into content modules rather than as standalone modules. Other level 4 modules should reference and reinforce the learning development to aid in the transfer of learning.	All level 4 modules include a variety of teaching and learning styles; the counselling specific modules particularly focus on reflection.
High impact pedagogies	<u>Group-based learning experiences</u> The capacity to work effectively in teams enhances learning through working with peers and develops student outcomes, including communication, networking and respect for diversity of perspectives relevant to <b>professionalism</b> and <b>inclusivity</b> . At least one module at level 4 should include an opportunity for group working. Group-based learning can also be linked to assessment at level 4 if appropriate. Consideration should be given to how students are	All counselling modules incorporate group learning. One counselling module has group working linked to assessment.

	allocated to avalue to factor every rise of diverse	
	allocated to groups to foster experience of diverse	
	perspectives and values.	
Inclusive	Accessible materials, resources and activities	All course material is
teaching,	All course materials and resources, including course	accessible.
learning and	guides, PowerPoint presentations, handouts and	
assessment	Moodle should be provided in an accessible format. For	
	example, font type and size, layout and colour as well	
	as captioning or transcripts for audio-visual materials.	
	Consideration should also be given to accessibility and	
	the availability of alternative formats for reading lists.	
Assessment	Assessment and feedback to support attainment,	All counselling specific

	opportunities to scaffold student attempts to adopt	reports, presentations,
	these ways of thinking and practising and providing	group supervision.
	opportunities to receive formative feedback on this. A	group supervision.
	writing in the disciplines approach recognises that	
	writing is not a discrete representation of knowledge but	
	integral to the process of knowing and understanding in	
	the discipline. It is expected that assessment utilises	
	formats that are recognisable and applicable to those	
	working in the profession. For example, project report,	
	presentation, poster, lab or field report, journal or	
	professional article, position paper, case report,	
	handbook, exhibition guide.	
High impact	Multi-disciplinary, interdisciplinary or interprofessional	At level 5 students
pedagogies	group-based learning experiences	engage in more
r	<u> </u>	advanced group work
		Saraneed group work

r		
	Building on experience of group working at level 4, at level 5 students should be provided with the opportunity to work and manage more complex tasks in groups that work across traditional disciplinary and professional boundaries and reflecting interprofessional work-place settings. Learning in multi- or interdisciplinary groups creates the opportunity for the development of student outcomes including <b>inclusivity</b> , communication and networking.	and are assessed accordingly.
Assessment	Variation of assessment	When agreed, students
for learning	An inclusive approach to curriculum recognises diversity and seeks to create a learning environment that enables equal opportunities for learning for all students and does not give those with a particular prior qualification (e.g. A-level or BTEC) an advantage or disadvantage. An holistic assessment strategy should provide opportunities for all students to be able to	registered with DDS can be offered alternative assignments, for example if they cannot take an exam.
	demonstrate achievement of learning outcomes in different ways throughout the course. This may be by offering alternate assessment tasks at the same assessment point, for example either a written or oral assessment, or by offering a range of different assessment tasks across the curriculum.	All counselling modules contain several different methods of assessment to cover the skill set required.
Curricula informed by employer and industry need	Career management skills Courses should provide support for the development of career management skills that enable student to be familiar with and understand relevant industries or professions, be able to build on work-related learning opportunities, understand the role of self-appraisal and planning for lifelong learning in career development, develop resilience and manage the career building process. This should be designed to inform the development of <b>excellence</b> and <b>professionalism</b> .	All students are allocated an academic tutor who is an experienced psychotherapist.
Curricula informed by employer and industry need / Assessment <i>for</i> learning / High impact pedagogies	Capstone project/dissertation The level 6 project or dissertation is a critical point for the integration and synthesis of knowledge and skills from across the course. It also provides an important transition into employment if the assessment is authentic, industry-facing or client-driven. It is recommended that this is a capstone experience, bringing together all learning across the course and creates the opportunity for the development of student outcomes including <b>professionalism</b> , <b>integrity</b> and	Students have to undertake an empirical project at level 6. The project has to relate to the subject of the course and thus is applied in nature and explores real world issues related to potential future
	creativity.	employment.

# Appendix C: Terminology

[Please provide a selection of definitions according to your own course and context to help prospective students who may not be familiar with terms used in higher education. Some examples are listed below]

awarding body	a UK higher education provider (typically a university) with the power to award higher education qualifications such as degrees
bursary	a financial award made to students to support their studies; sometimes used interchangeably with 'scholarship'
collaborative provision	a formal arrangement between a degree-awarding body and a partner organisation, allowing for the latter to provide higher education on behalf of the former
compulsory module	a module that students are required to take
contact hours	the time allocated to direct contact between a student and a member of staff through, for example, timetabled lectures, seminars and tutorials
coursework	student work that contributes towards the final result but is not assessed by written examination
current students	students enrolled on a course who have not yet completed their studies or been awarded their qualification
delivery organisation	an organisation that delivers learning opportunities on behalf of a degree-awarding body
distance-learning course	a course of study that does not involve face-to-face contact between students and tutors
extracurricular	activities undertaken by students outside their studies
feedback (on assessment)	advice to students following their completion of a piece of assessed or examined work
formative assessment	a type of assessment designed to help students learn more effectively, to progress in their studies and to prepare for summative assessment; formative assessment does not contribute to the final mark, grade or class of degree awarded to students

higher education provider	organisations that deliver higher education
independent learning	learning that occurs outside the classroom that might include preparation for scheduled sessions, follow-up work, wider reading or practice, completion of assessment tasks, or revision
intensity of study	the time taken to complete a part-time course compared to the equivalent full-time version: for example, half-time study would equate to 0.5 intensity of study
lecture	a presentation or talk on a particular topic; in general lectures involve larger groups of students than seminars and tutorials
learning zone	a flexible student space that supports independent and social earning
material information	information students need to make an informed decision, such as about what and where to study
mode of study	different ways of studying, such as full-time, part-time, e-learning or work-based learning
modular course	a course delivered using modules
module	a self-contained, formally structured unit of study, with a coherent and explicit set of learning outcomes and assessment criteria; some providers use the word 'course' or 'course unit' to refer to individual modules
national teaching fellowship	a national award for individuals who have made an outstanding impact on student learning and the teaching profession
navigability (of websites)	the ease with which users can obtain the information they require from a website
optional module	a module or course unit that students choose to take
performance (examinations)	a type of examination used in performance- based subjects such as drama and music
professional body	an organisation that oversees the activities of a particular profession and represents the interests of its members
prospective student	those applying or considering applying for any programme, at any level and employing any mode of study, with a higher education provider

regulated course	a course that is regulated by a regulatory body
regulatory body	an organisation recognised by government as being responsible for the regulation or approval of a particular range of issues and activities
scholarship	a type of bursary that recognises academic achievement and potential, and which is sometimes used interchangeably with 'bursary'
semester	either of the parts of an academic year that is divided into two for purposes of teaching and assessment (in contrast to division into terms)
seminar	seminars generally involve smaller numbers than lectures and enable students to engage in discussion of a particular topic and/or to explore it in more detail than might be covered in a lecture
summative assessment	formal assessment of students' work, contributing to the final result
term	any of the parts of an academic year that is divided into three or more for purposes of teaching and assessment (in contrast to division into semesters)
total study time	the total time required to study a module, unit or course, including all class contact, independent learning, revision and assessment
tutorial	one-to-one or small group supervision, feedback or detailed discussion on a particular topic or project
work/study placement	a planned period of experience outside the institution (for example, in a workplace or at another higher education institution) to help students develop particular skills, knowledge or understanding as part of their course
workload	see 'total study time'
written examination	a question or set of questions relating to a particular area of study to which candidates write answers usually (but not always) under timed conditions
